Q2'26 adjusted op. margin

>11,900
$100k+ TTM customers, Sep'26

~900%
Net revenue retention, Sep'26

$131.7bn
Cash and ST investments, Jun'26

Investment thesis

Demand is not the question. Quarterly revenue rose from $376m in Q1'25 to $11.6bn in Q2'26, and the S-1's 86x multiple on Q4'24 implies about $16.9bn for Q3'26. Customers paying $100k+ a year rose 12.5x in twelve months to more than 11,900.

Unit economics turned in 1H26. On the S-1's functional view gross margin moved from -94.8% in FY24 to 85.4% in 1H26, and adjusted operating margin reached 19% in Q2'26, as revenue outran compute bought 12 to 18 months ahead.

Compute is the swing factor. The S-1 puts fixed or minimum purchase commitments at ~$265.6bn at Jun'26, and ~$245bn more were signed after it. From the contract terms we build FY27E compute of $82.4bn, 3.7x Q2'26's run-rate; $37.2bn (45%) of it is SpaceXAI, an 'up to' amount that is cancellable after early 2027. The FY27E margin then rests on revenue per compute dollar: 2.08 in Q2'26, 1.50 in our base case, 1.45 to break even.

Governance caps the multiple. The Founder LLC's Class F share carries 50.1% of votes, the Long-Term Benefit Trust elects a board majority, and public benefit issuances can add up to 2% of shares for each 50% gain in the share price.

Illustrative stance: Overweight. Base-case value $73 per share (9x FY27E revenue plus net cash, a Keswick assumption), 25% above the $58.90 Series H price per common share. Bear $41, bull $116.

Exhibit 1: Key forecasts, Keswick base case

A = S-1 reported; E = Keswick estimate (illustrative assumption) on the pale band

	FY24A	FY25A	FY26E	FY27E

What would change our view

- Up: Q3'26 reported above the ~$16.9bn the S-1 implies, or FY27E revenue per compute dollar nearer Q2'26's 2.08 than our 1.50 base.
- Down: FY27E revenue per compute dollar below 1.45 (base 1.50) takes the adjusted margin below zero at our base compute (page 6).

Analyst: Ellen Thwaite, Keswick Research (fictional broker and author). Prices, forecasts and valuations are illustrative Keswick assumptions: the S-1 sets no price range.

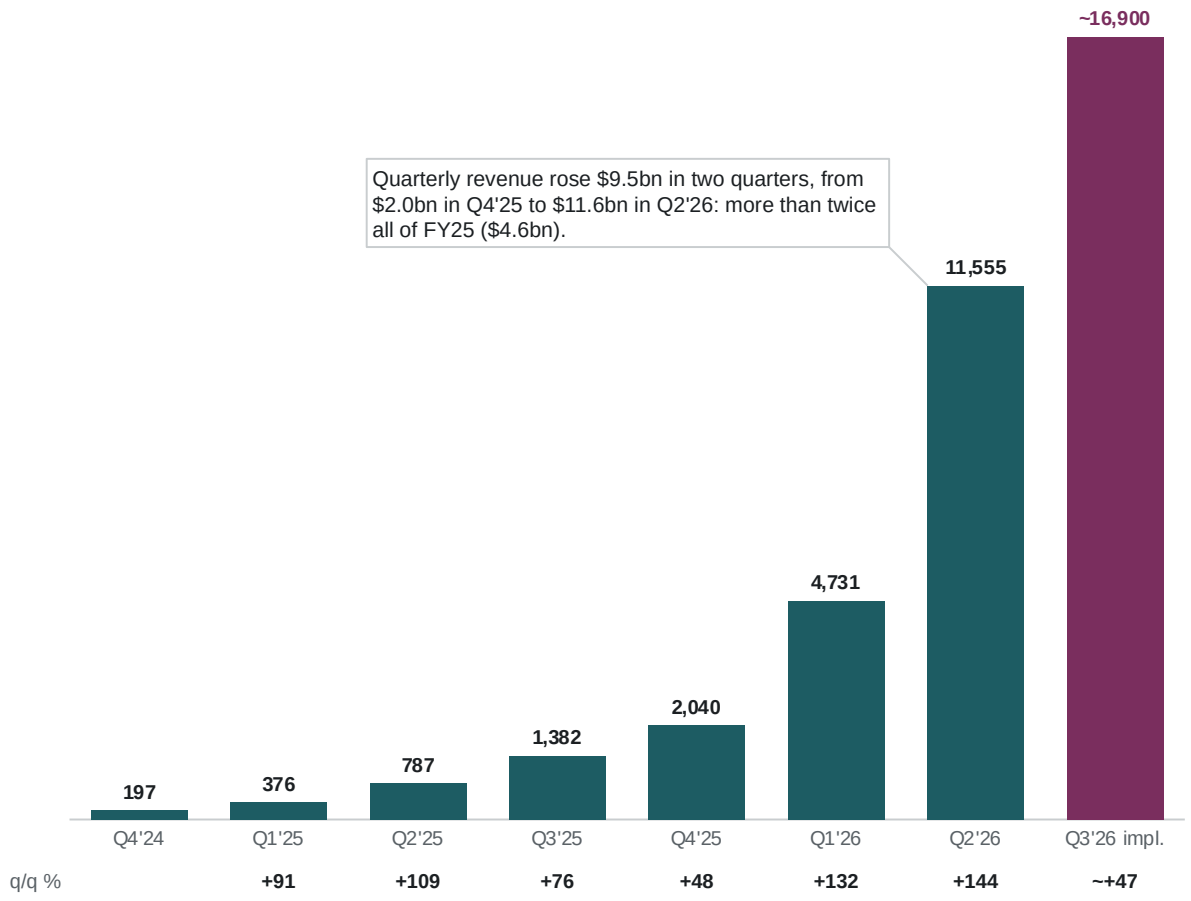

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.

2 | REVENUE DRIVERS

Revenue rose from $376m in Q1'25 to $11.6bn in Q2'26; the S-1 implies ~$16.9bn for Q3'26

Exhibit 4: Quarterly revenue

$m, with q/q growth beneath; Q3'26 in plum is implied by the S-1 (86x Q4'24's $197m), not reported

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Quarterly Results of Operations; Risk Factors (Q4'24 revenue $197m); Business (Q3'26 revenue 86x Q4'24). Keswick q/q computation.

Exhibit 5: Revenue by pricing model, geography and channel

$m unless stated

$m	FY23	FY24	FY25	1H25	1H26
By pricing model					
Consumption-based	39	288	3,796	983	13,064
Subscription-based	2	98	789	180	3,222

By billing geography					
United States	34	263	3,362	820	11,763
International	7	123	1,223	343	4,523
International share (%)	*17.1*	*31.9*	*26.7*	*29.5*	*27.8*
By channel					
Via CSP marketplaces (% of revenue, approx.)	11	32	47	44	48
Total revenue	**41**	**386**	**4,585**	**1,163**	**16,286**

Source: Anthropic, PBC S-1 (26 Oct 2026): Notes to Financial Statements, Note 2 Revenue (including the CSP marketplace shares); MD&A.

Exhibit 6: Customers with $100k+ of TTM revenue

~ and > as the S-1 words each figure (approximately, more than)

Count as of	Customers at $100k+ TTM	Revenue period	Their revenue ($m)	Share of revenue (%)
Dec'23	~20	FY23	~37	~90
Dec'24	~200	FY24	~220	~57
Dec'25	~1,500	FY25	~3,500	~76
Jun'26	>6,000	1H26*	12,000	~74
Sep'26	**>11,900**		**not given**	**not given**

* The S-1 pairs the Jun'26 TTM customer count with their 1H26 revenue; we show the pairing as given.

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Key Factors Affecting Our Performance; Results of Operations.

- One reportable segment: the S-1 splits revenue by pricing model, billing geography and channel, not by product. Subscriptions grew faster in 1H26 (+1,690% against +1,229%); consumption is still 80%.
- Net revenue retention about 900% at Sep'26; about 79% of Q3'26 revenue came from outside the top five customers, up from about 64% in Q1'26.

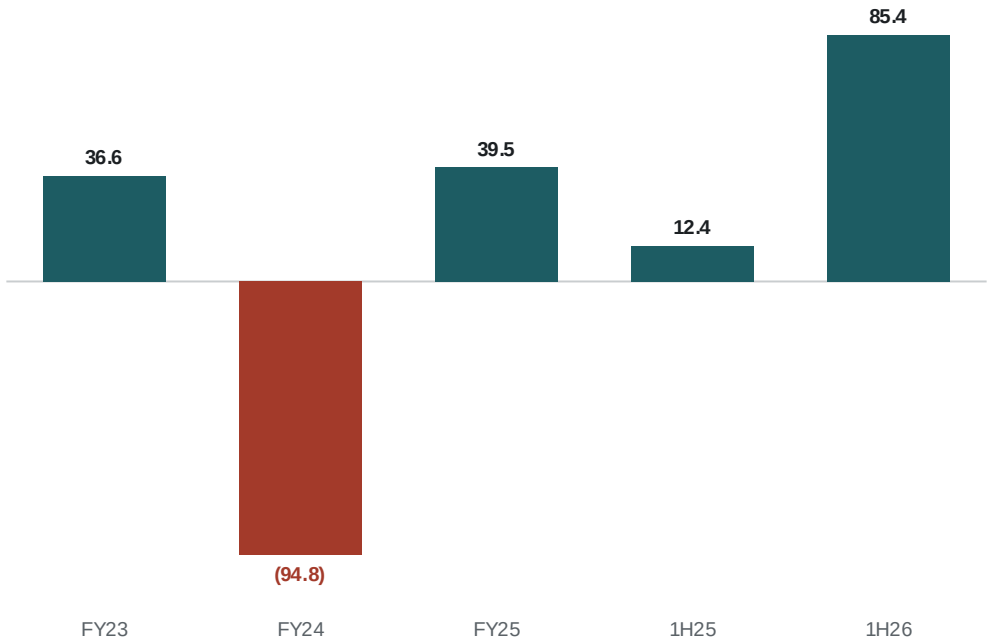

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.

3 | UNIT ECONOMICS

Gross margin swung from -94.8% in FY24 to 85.4% in 1H26 as revenue outran fixed compute

Exhibit 7: Gross margin by period

% of revenue; revenue less cost of revenue (Note 8, functional view); red is negative

Source: Anthropic, PBC S-1 (26 Oct 2026): Notes to Financial Statements, Note 8 Supplemental Operating Expense Information. Keswick computation.

Exhibit 8: Efficiency measures the S-1 discloses

as stated in the S-1

Metric	As the S-1 states it
TTM revenue per employee	$1.4m (Sep'25) to >$6.6m (Sep'26)
Q2'26 growth y/y	revenue +1,368% against compute +300%
Customer cost per task, Opus 5.5 vs Opus 5	about 40% lower
Code contributions written by Claude	over 90% (Sep'26)

Source: Anthropic, PBC S-1 (26 Oct 2026): Prospectus Summary, Strengths of Our Financial Model; MD&A, Operating Efficiency and Our Customers.

Exhibit 9: Operating expenses by function

$m and % of revenue; the S-1's Note 8 presentation, which carries cost of revenue

	FY23	FY24	FY25	1H25	1H26
$m					
Revenue	41	386	4,585	1,163	16,286
Cost of revenue	26	752	2,773	1,019	2,380

Sales and marketing	185.4	42.2	19.9	20.6	23.4
General and administrative	165.9	45.6	24.5	16.3	6.4
Operating margin	**(1,343.9)**	**(772.0)**	**(175.8)**	**(183.6)**	**(4.3)**

Source: Anthropic, PBC S-1 (26 Oct 2026): Notes to Financial Statements, Note 8; Results of Operations. Keswick computation of percentages.

Exhibit 10: Revenue per dollar of compute, by quarter

all compute and infrastructure, every workload; computed by Keswick

	Q1'25	Q2'25	Q3'25	Q4'25	Q1'26	Q2'26
Revenue ($m)	376	787	1,382	2,040	4,731	11,555
Compute and infrastructure ($m)	944	1,390	2,047	2,945	3,387	5,558
Revenue per $1 of compute ($)	**0.40**	**0.57**	**0.68**	**0.69**	**1.40**	**2.08**

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Quarterly Results of Operations; Compute Efficiency. Keswick computation.

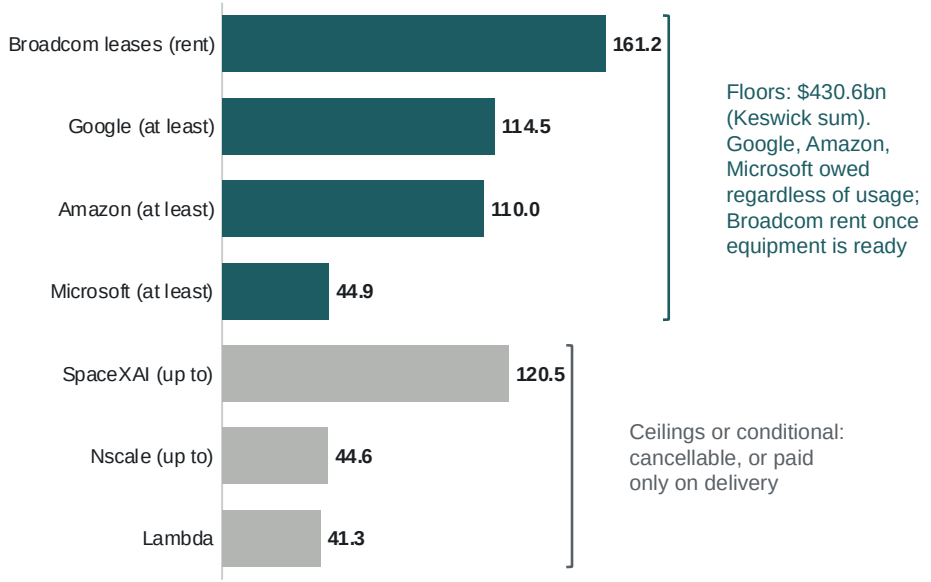

- Cost of revenue was 14.6% of 1H26 revenue ($2.4bn) against $8.9bn of compute and infrastructure. Cost of revenue also holds personnel and overhead, so at least $6.6bn of compute served research, model development, internal use and free access.
- R&D was 59.8% of 1H26 revenue; the S-1 lists compute for model development, research and internal use, personnel, software and overhead, and gives no split. Margin can fall when compute lands ahead of revenue: FY23's 36.6% became -94.8% in FY24.
- Two S&M ratios, two definitions: Note 8's functional sales and marketing (23.4% of 1H26 revenue, $3,808m) includes personnel; the by-nature 'sales, marketing and partnerships' line ($3,168m, 19.5%) excludes them.

4 | COMPUTE COSTS AND COMMITMENTS

The S-1 puts fixed compute commitments at ~$265.6bn at Jun'26, with ~$245bn more signed since

Exhibit 11: Named compute contracts, floors and ceilings

$bn over each contract's term as disclosed; teal = floor, grey = ceiling or conditional; the two do not add

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Contractual Obligations (Infrastructure Service Arrangements; Infrastructure Equipment Leases). Keswick subtotal.

Exhibit 12: The S-1's own aggregates

$bn; different dates and bases, so the rows overlap and are not additive

What the S-1 aggregates	As of / signed	$bn
Non-cancellable purchase commitments over one year (Note 13)	Dec'25	54.6
Fixed or minimum purchase commitments (Note 13)	**Jun'26**	**~265.6**
Minimum obligations signed after Jun'26, some conditional (Note 17)	Jul'26 to filing	~245
Short-term minimums signed after Jun'26 (Note 17)	Jul'26 to filing	~21
Further TPU capacity for 2028 to 2031, estimated (MD&A)	not in the above	125 to 150
AMD systems if the initial tranche is fully procured (MD&A)	not in the above	>20

Source: Anthropic, PBC S-1 (26 Oct 2026): Notes 13 and 17 to the Financial Statements; MD&A, Contractual Obligations (the obligations table itself is left blank).

Exhibit 13: Terms of each named contract

as described in the S-1; ceilings and conditional contracts in grey

Counterparty	Term	Floor or ceiling, cancellation and payment
Broadcom	5-yr leases	rent ~$32.2bn a year if level; owed once equipment is ready; non-cancellable except default
Google	Apr'26 to Jul'33	at least; regardless of usage; true-up on shortfall
Amazon	May'26 to Apr'36	at least; regardless of usage; true-up on shortfall
Microsoft	Nov'26 to May'33	at least; regardless of usage; per-tranche exit if undelivered
SpaceXAI	into 2029	up to; ~$3.1bn a month once fully delivered (expected Dec'26; ramp fees differ); cancellable on 90 days' notice after Jan/Mar'27
Nscale	into 2033	up to; fees accrue only on delivery; financing condition
Lambda	into 2034	fees accrue on delivery; $34.9bn terminable if the facility lease is not secured

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Contractual Obligations.

Exhibit 14: Funding identified against the commitments

$bn; most partner facilities settle in shares, so drawing them dilutes

Source	When	$bn	Condition
Cash and short-term investments	Jun'26	131.7	on balance sheet
Credit Facility, undrawn	Jun'26	3.2	$3.25bn; no borrowings, $78m letters of credit
Google 2026 note purchase agreement	draw to Dec'30	10.0 to 20.0	cut by up to $10.0bn if Google buys IPO shares
Amazon 2026 note purchase agreement	30 months	15.0	in $5.0bn steps on compute milestones; settles in shares
Broadcom note purchase agreement	5 years	42.0	only for lease rent; 9% PIK, converts at 90% of VWAP
AMD Class N share purchase	from 2027	5.0	up to; if GPU delivery conditions are achieved
Total identified (Keswick sum)		**206.9 to 216.9**	

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Liquidity and Capital Resources (Revolving Credit Agreement; Convertible Notes; AMD). Keswick total.

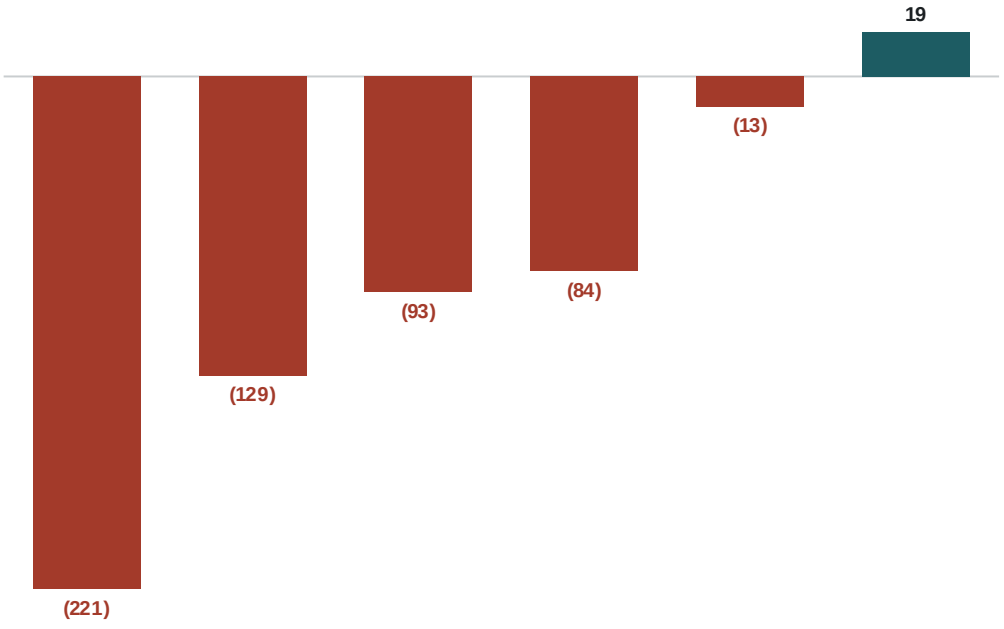

- The Sep'26 A&R Credit Facility raises the revolver to $15bn; the S-1 leaves its availability blank, so we leave it out of the total.
- The S-1 says it procures compute 12 to 18 months before it is available, so in our reading much of the FY27 cost step is already signed; SpaceXAI is cancellable and Nscale and Lambda are paid on delivery. Our FY27E build is on page 7.

5 | PATH TO PROFITABILITY

Adjusted margin reached 19% in Q2'26; the S-1 warns new compute may compress it

Exhibit 15: Quarterly adjusted operating margin

% of revenue; red is negative; adjusted excludes SBC, non-cash charity and the Bartz settlement

	Q1'25	Q2'25	Q3'25	Q4'25	Q1'26	Q2'26
GAAP op. margin (%)	(249)	(152)	(224)	(139)	(35)	8
Compute (% of rev.)	251	177	148	144	72	48

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Quarterly Results of Operations; Quarterly Adjusted Operating Income (Loss).

- Compute and infrastructure fell from 251% of revenue in Q1'25 to 48% in Q2'26 against a base committed in advance; the margin is operating leverage on fixed compute.
- The S-1 says operating and adjusted margins may compress as new compute comes online, and expects short-term compute, at a higher unit cost, to rise in the near term and compress them.
- Of $26.6bn of unrecognised RSU expense at Jun'26, $2.9bn relates to RSUs whose service condition was satisfied or partially satisfied: the S-1's catch-up had the IPO closed on 30 Jun'26 (the actual figure is left blank). Keswick view: GAAP losses widen even as adjusted income grows.

Exhibit 16: 1H26 operating loss to adjusted operating income

$m; grey marks the non-GAAP add-backs, red the GAAP loss

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Non-GAAP Financial Measures (reconciliation).

Exhibit 17: Cash flow, stock-based compensation and compute intensity

$m unless stated; red is negative

$m	FY23	FY24	FY25	1H25	1H26
Operating cash flow	**(1,627)**	**(5,692)**	**(2,637)**	**(1,513)**	**3,929**
Investing cash flow	(2)	(22)	(3,077)	(49)	(17,181)
Financing cash flow	2,320	7,248	19,960	4,749	110,774
Stock-based compensation	29	192	1,165	286	2,185
Compute and infra (% of revenue)	1,056	653	160	201	55

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Liquidity and Capital Resources (Cash Flows); Results of Operations.

6 | KEY RISKS

Eight risks from the S-1 we would underwrite first, ranked by what they could cost the equity

Exhibit 18: Key risks, ranked by Keswick by potential impact on equity value

S-1 disclosures quoted or paraphrased; the Keswick view on the pale band is the analyst's judgement

#	Risk (S-1 Risk Factors)	What the S-1 discloses	Keswick view
1	**Compute commitments are fixed; revenue is not**	Commitments 'generally must be satisfied regardless of our revenue or utilization'; Google and Amazon floors ($224.5bn) carry true-ups; Microsoft ($44.9bn) is non-cancellable bar undelivered tranches	Highest impact: our FY27E base margin is 2.3%; revenue per compute dollar 3.4% below base (1.45) erases it. Our bear case, 23% below (1.15), gives -18.0%.
2	**Staying at the frontier**	Success depends on developing the most capable models; versions released in the prior six months were over 80% of Q3'26 revenue	Revenue turns over with each release: a missed generation is a revenue event, not a slow fade.
3	**Customer and channel concentration**	Top five customers about 25% of 9M26 revenue; CSP marketplaces 48% of 1H26 revenue and 58% of receivables; many top customers lack long-term contracts	Easing (79% of Q3'26 revenue outside the top five), but the CSPs are also suppliers, investors and competitors.
4	**Revenue from policy-violating customers**	About 5% to 7% of 9M26 revenue came from customers later found in breach of usage policy or terms; enforcement stepped up in Aug and Sep 2026	A known headwind to the run-rate; one reason our Q4'26E is only +10% q/q.
5	**Growth decay and seasonality**	The S-1 expects the growth rate to decline, possibly significantly; spend fell about 20% in the two weeks to 2 Jan 2026	Our base FY27E growth of 138% is set by compute, not by trend; quarterly results will be noisier as growth slows.
6	**Safety-led release limits, regulation and litigation**	Mythos first released through Project Glasswing; Fable 5 released with safety restrictions; $1.5bn Bartz settlement charged in 2025	Safety is part of the enterprise case, but it can delay revenue from a new model; legal costs are lumpy.
7	**Governance and control**	Class F carries 50.1% of votes; the LTBT elects a board majority; controlled-company exemptions; PBC directors balance stakeholders against returns	Class A holders cannot influence control: we ascribe no takeover value.
8	**Dilution and stock-based compensation**	$26.6bn unrecognised RSU expense (Jun'26); Amazon notes convert into 1.84bn Class N shares at the fixed price, more at a lower IPO price, subject to Amazon's ownership cap; up to 2% public benefit issuance per 50% price gain; Broadcom notes convert at 90% of VWAP	Per-share values use 16.94bn fully diluted shares (Amazon notes at the fixed price) and exclude future issuances.

Source: Anthropic, PBC S-1 (26 Oct 2026): Risk Factors; Risk Factors Summary; MD&A (Key Factors Affecting Our Performance; Revenue; Contractual Obligations; Critical Accounting Estimates); Prospectus Summary.

Exhibit 19: Risk 1 in numbers: FY27E adjusted operating margin by revenue and compute

Keswick sensitivity (illustrative assumptions); % of revenue; columns are FY27E compute and infrastructure

FY27E revenue; margin %	Floor $57.6bn	Base $82.4bn	Full $98.5bn
Bear: $94.7bn	8.2	(18.0)	(35.0)
Base: $123.6bn	22.4	**2.3**	(10.7)
Bull: $152.4bn	31.2	14.9	4.4
Break-even FY27E revenue ($bn)	**83.4**	**119.4**	**142.7**

Revenue is held constant across the columns, even with SpaceXAI cancelled, so 1.15, 1.50 and 1.85 per compute dollar hold only at base; the same revenue gives 1.65, 2.15, 2.65 at the floor and 0.96, 1.25, 1.55 at full. The floor is the low end of $57.6bn to $63.8bn (right).

Source: Keswick Research assumptions on S-1 contract terms (MD&A, Contractual Obligations: commitments generally owed regardless of revenue or utilisation).

Reading the grid

- Columns are FY27E compute cases from the S-1 contract terms (page 7): floor, SpaceXAI exited at the earliest date; base; full, a full year of Broadcom rent. Rows are our revenue cases. Non-compute adjusted opex is 31% of revenue throughout.
- At base compute, revenue has to reach $119.4bn, or $1.45 per compute dollar, to break even: 3.4% below our base. Q2'26 ran at $2.08 and FY25 at $0.63.
- Our bear case, 1.15 per compute dollar, sits between FY25 (0.63) and Q1'26 (1.40): roughly where the ratio would land if the new capacity filled a year late.
- Cancelling SpaceXAI is the one large lever the contracts leave the company; the floors are owed either way. The S-1 does not split its $3.1bn a month between the agreements ending their initial periods in Jan'27 and Mar'27: an exit after Jan'27 costs about four months of 2027 ($12.4bn), after Mar'27 about six ($18.6bn), so the floor is $57.6bn to $63.8bn; the grid shows the lower end.

7 | KESWICK FORECAST: ANALYST ASSUMPTIONS

Keswick base case: FY27E revenue of $123.6bn on $82.4bn of compute built from contract terms; margin 2.3%

Exhibit 20: Keswick forecast (analyst assumptions on S-1 history and contract terms)

$bn unless stated; A = S-1 reported, E = Keswick estimate on the pale band

	FY24A	FY25A	FY26E	FY27E bear	FY27E base	FY27E bull
Revenue ($bn)	**0.4**	**4.6**	**51.9**	**94.7**	**123.6**	**152.4**
Growth (%)	*841*	*1,088*	*1,031*	*83*	*138*	*194*
Compute and infrastructure ($bn)	2.5	7.3	26.7	82.4	82.4	82.4
% of revenue	*653.4*	*159.8*	*51.5*	*87.0*	*66.7*	*54.1*
Revenue per $1 of compute ($)	*0.15*	*0.63*	*1.94*	*1.15*	*1.50*	*1.85*
Non-compute adjusted opex ($bn)	0.7	2.1	17.1	29.4	38.3	47.2
% of revenue	*168.9*	*46.1*	*33.0*	*31.0*	*31.0*	*31.0*
Adjusted operating income ($bn)	**(2.8)**	**(4.9)**	**8.0**	**(17.0)**	**2.9**	**22.8**
Adjusted operating margin (%)	(722)	(106)	15.5	(18.0)	2.3	14.9

Non-compute adjusted opex = cash personnel, sales, marketing and partnerships, and other operating costs, excluding stock-based compensation, non-cash charity and the Bartz settlement; in 1H26 it was $5,723m, 35.1% of revenue. FY26E includes Q1 and Q2 reported.

Source: Anthropic, PBC S-1 (26 Oct 2026): Summary Consolidated Financial Data; MD&A, Non-GAAP reconciliation. Estimates: Keswick.

Exhibit 21: Keswick FY27E compute build from the S-1's contract terms

$bn; teal = Q2'26 reported run-rate; pale teal = Keswick additions and the Keswick total; labels rounded

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Quarterly Results of Operations; Contractual Obligations (SpaceXAI $3.1bn a month once fully delivered, expected Dec'26; Microsoft $44.9bn over Nov'26 to May'33; Broadcom $161.2bn over 5 years). Keswick assumptions.

Assumptions (Keswick, illustrative)

- FY26E: Q3'26 at the S-1-implied ~$16.9bn; Q4'26E +10% q/q; 2H26 compute at 50% of revenue, in line with Q2'26's run-rate plus SpaceXAI's ramp and Microsoft from Nov'26; non-compute adjusted opex 33% of revenue ($17.1bn).
- FY27E compute is built from the contract terms, not from a % of revenue, and held at $82.4bn in all three revenue cases. It is not fixed: $37.2bn (45%) is SpaceXAI at full capacity for a full year, an 'up to' amount either party can cancel on 90 days' notice after Jan/Mar'27 (floor and full cases in Exhibit 22).
- FY27E revenue = compute x revenue per compute dollar: 1.15 bear, 1.50 base, 1.85 bull, against 1.94 for FY26E and 2.08 in Q2'26, since new capacity lands ahead of the revenue it serves.
- Non-compute adjusted opex falls from 35.1% of revenue in 1H26 to 33% in FY26E and 31% in FY27E. We stop at FY27E: FY28 depends on $125bn to $150bn of TPU capacity whose payments the S-1 calls not yet determinable.

Exhibit 22: FY27E compute cases and what none of them includes

$bn; Keswick readings of the S-1 terms on the pale band

FY27E compute case	$bn
Floor: SpaceXAI exited at the earliest date (4 to 6 months; split not given)	57.6 to 63.8
Base: as built above	**82.4**
Full: Broadcom rent for a full level year	98.5

Not in any case: Google and Amazon above the Q2'26 run-rate ($26.6bn a year if straight-lined); Lambda, Nscale and AMD, paid on delivery.

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Contractual Obligations. Keswick assumptions.

Exhibit 23: How FY26E revenue is built

$bn; plum = implied from two S-1 statements; Keswick estimate on the pale band

Quarter	Revenue ($bn)	Basis
Q1'26	4.7	S-1 reported
Q2'26	11.6	S-1 reported
Q3'26	~16.9	S-1 implied: 86x Q4'24
Q4'26E	18.6	Keswick: +10% q/q
FY26E	**51.9**	**sum**

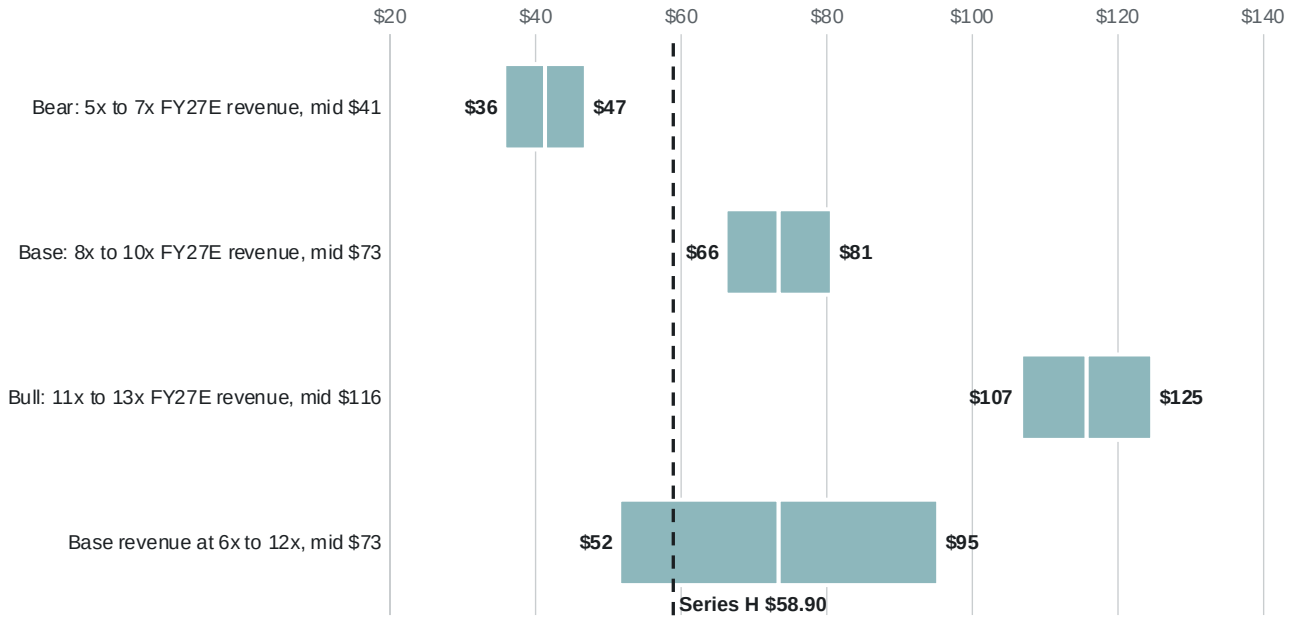

Source: Anthropic, PBC S-1 (26 Oct 2026): MD&A, Quarterly Results of Operations; Business; Risk Factors. Q4'26E is a Keswick assumption.

8 | VALUATION AND SCENARIOS

Base case $73 per share on 9x FY27E revenue, 25% above the Series H price; bear $41, bull $116

Exhibit 24: Value per share by scenario (illustrative assumptions)

$ per fully diluted share; pale bars are Keswick ranges, the white notch the mid-point (in each label); the dashed line is the Series H price

Source: Keswick Research assumptions; S-1 Certain Relationships and Related Person Transactions (Series H price), Note 10 (10:1 conversion), Prospectus Summary (FD shares), Summary Consolidated Financial Data (net cash).

Exhibit 25: Multiples implied by each value, on reported and FY26E revenue

EV = equity less $131.7bn net cash; Q2'26 annualised revenue $46.2bn; FY26E is Keswick's; FY27E multiples in Exhibit 26

	Equity ($bn)	EV ($bn)	EV / Q2'26 ann. rev. (x)	EV / FY26E rev. (x)
Series H price, $58.90	998	866	18.7	16.7
Bear value, $41	700	568	12.3	11.0
Base value, $73	**1,244**	**1,112**	**24.1**	**21.4**
Bull value, $116	1,960	1,829	39.6	35.3

Source: Keswick computation from S-1 Quarterly Results of Operations, Summary Consolidated Financial Data and the Series H price; estimates are Keswick assumptions.

Exhibit 26: Scenario valuation

$bn unless stated; Keswick assumptions on the pale band

Scenario (Keswick assumptions)	Bear	Base	Bull
FY27E revenue ($bn)	94.7	123.6	152.4
FY27E growth (%)	83	138	194
FY27E adjusted operating margin (%)	(18.0)	2.3	14.9
EV / FY27E revenue (x), mid of range	6	9	12
Enterprise value ($bn)	568	1,112	1,829
Net cash, Jun'26 ($bn)	131.7	131.7	131.7
Equity value ($bn)	700	1,244	1,960
Fully diluted shares (bn)	16.94	16.94	16.94
Value per share ($)	**41**	**73**	**116**
vs Series H $58.90 (%)	(30)	25	97

Source: Keswick Research assumptions; S-1 Summary Consolidated Financial Data (cash $131,651m), Prospectus Summary (FD shares); Risk Factors and MD&A, Convertible Notes (indebtedness).

- Why revenue: adjusted profit only turned positive in 1H26 and our base FY27E margin is 2.3%, so an earnings multiple says nothing yet (the base EV is 386x FY27E adjusted operating income).
- No peer multiples are used: the S-1 gives none and we import none. Multiples are Keswick assumptions, kept modest because the base FY27E margin is only 2.3%.
- Reference point: the Series H price ($589.0095 a preferred share, $58.90 per common share at 10:1) on 16.94bn shares implies about $998bn of equity and 7.0x FY27E base revenue net of cash.
- Net cash is Jun'26 cash and short-term investments. The $6.2bn of indebtedness in the S-1's Risk Factors is the Amazon Notes, which the fully diluted count already treats as converted; $0.4bn of finance lease liabilities is ignored.
- What moves the base value: each 1x of FY27E revenue multiple is worth about $7.30 a share; each 0.10 of revenue per compute dollar about $4.40 at 9x.
- Excluded: IPO proceeds, Q3'26 cash flow, Google's option to buy shares alongside the IPO, RSU tax withholding and future public benefit issuances.
