1 | SITUATION OVERVIEW | ANTHROPIC, PBC INITIAL PUBLIC OFFERING

Situation overview: the S-1 in one page

$16.3bn
H1 2026 revenue, up 1,300% on H1 2025

$974m
Q2 2026 operating income, an 8% margin

>11,900
customers at $100k+ TTM revenue, Sep 2026

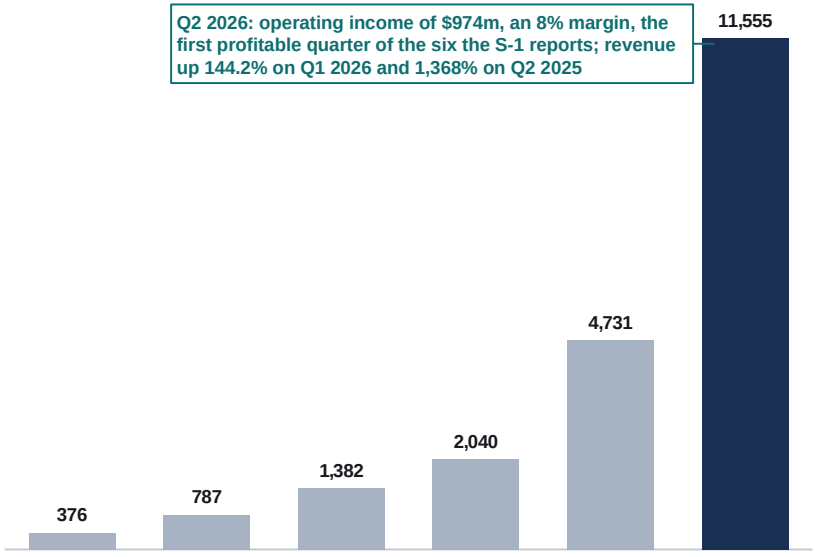

~900%
Net Revenue Retention, Sep 2026

$131.7bn
cash and short-term investments, Jun 2026

$141.1bn
capital raised to Jun 2026

Quarterly revenue, margin and growth

$m, columns; GAAP operating margin and growth on the prior quarter beneath; quarters to June 2026

	Q1 25	Q2 25	Q3 25	Q4 25	Q1 26	Q2 26
Operating margin	(249%)	(152%)	(224%)	(139%)	(35%)	8%
Growth, prior qtr		+109%	+76%	+48%	+132%	+144%

Operating margin is GAAP operating income (loss) over revenue; growth on the prior quarter is Halden & Rowe's arithmetic on the S-1 quarterly table. Q2 2026 is the latest quarter with reported results.

Source: S-1, MD&A, Quarterly Results of Operations.

Still blank in the S-1 as filed

Q3 2026 revenue and nine-month results; Run-Rate Revenue; the aggregate committed compute spend; share counts, ownership percentages and the price range. Each is expected in a later amendment and would update this book. Halden & Rowe is a fictional bank and this book a demonstration: the S-1 already names Goldman Sachs and Morgan Stanley as representatives of the underwriters.

Colour key, every page: navy, an S-1 figure for the period or series in focus; grey-blue, an S-1 comparison (earlier period or second series) or a peer; ochre, a Halden & Rowe derivation or assumption; teal, a look-here mark. Negatives are in parentheses.

The offering as filed

S-1 of 26 October 2026; terms the S-1 leaves blank are set in italics

Term	As stated in the S-1
Issuer	Anthropic, PBC, a Delaware public benefit corporation
Security, listing	Class A common stock; Nasdaq Global Select Market, "ANT"
Shares offered	*Primary and secondary Class A: not yet stated in the S-1*
Price range	*Not yet stated in the S-1*
Over-allotment	30-day option for additional Class A shares from the company
Use of proceeds	General corporate purposes, incl. compute; RSU tax withholding
Concurrent placement	Google option: up to $10.0bn of Class N at the IPO price
Governance	LTBT elects a board majority; Class F holds 50.1% of votes
Lock-up	By holder group: officers and non-founder directors 10% from day 1; certain holders staged from day 27; founders and some holders over 0.5% up to day 365
Representatives	Goldman Sachs, Morgan Stanley; 20 other underwriters

Source: S-1 cover page, Prospectus Summary (The Offering) and Underwriting (Lock-Up and Market Standoff Agreements).

Summary financials

$m; years to December and six months to June

	2024	2025	H1 2025	H1 2026
Revenue	386	4,585	1,163	**16,286**
Growth (%)	*841*	*1,088*		**1,300**
Operating income (loss)	(2,980)	(8,060)	(2,135)	**(693)**
Adj. operating income (loss)	(2,788)	(4,854)	(1,849)	**1,618**
Adj. operating margin (%)	*(722)*	*(106)*	*(159)*	**10**
Net loss	(8,309)	(41,965)	(12,969)	**(80,748)**
Operating cash flow	(5,692)	(2,637)	(1,513)	**3,929**

Adjusted: excludes stock-based compensation, non-cash charitable contributions and the Bartz settlement. Net loss includes the change in fair value of convertible notes, derivative liabilities and SAFEs: $34.3bn in 2025 and $72.4bn in H1 2026.

Source: S-1, Summary Consolidated Financial Data; MD&A, Non-GAAP Financial Measures; Cash Flows.

Halden & Rowe view

- Scale and profit arrived together: Q2 2026 revenue of $11.6bn was 1,368% above Q2 2025 while compute expense grew 300%, and the quarter turned an operating profit.
- The equity story rests on four tests investors will put: durability of growth, the eight compute arrangements the S-1 names (minimums, caps and estimates; the aggregate is blank), the PBC and LTBT governance, and revenue quality.

2 | BUSINESS AND MODEL OVERVIEW

Business and model overview

How Claude is built, sold and distributed

Offer layers and channels, with the S-1 figure that evidences each; Sep 2026 unless stated

Layer	What it is	S-1 evidence
Products		
Claude models	Mythos (incl. Fable), Opus, Sonnet, Haiku	Versions <6 months old: >80% of Q3 2026 revenue
Claude Platform	The primitives for customers' own agents	>50% of $100k+ customers use it and an app
Claude Code	Coding agent; research preview Feb 2025	Top 5% Code users: ~20x non-users' <$75 a month
Claude Cowork	Knowledge-work agent; preview Jan 2026	Adoption ahead of Claude Code at the same point
Revenue model		
Pay-for-intelligence	Consumption, metered in tokens, priced by model	$13.1bn, 80% of H1 2026 revenue
Subscriptions	Enterprise and prosumer plans, 12 months or less	$3.2bn, 20% of H1 2026 revenue
Distribution		
Direct and Applied AI	Go-to-market and forward-deployed engineers	Sales, marketing and partners: 19% of H1 2026
Cloud marketplaces	AWS, Google Cloud, Azure; fee paid to each CSP	Channel partner fees up $2.7bn in H1 2026
Ecosystem	SIs, data platforms, Ode with Anthropic	>150,000 certified practitioners, >4,000 firms

Source: S-1, Prospectus Summary; Business; MD&A, How We Generate Revenue and Our Customers and Approach to Claude Diffusion.

The four drivers of the financial model, as the S-1 frames them

Driver and the S-1 metric behind it

Driver	S-1 metric
Adoption of Claude	Over 11,900 customers at $100k+ TTM revenue, from over 950 a year earlier
Compute efficiency	Q2 2026 revenue up 1,368% year on year against compute and infrastructure expense up 300%
Operating efficiency	TTM revenue per employee over $6.6m, from $1.4m; about 5,300 employees
Compute investments	Procured 12 to 18 months ahead; margins may compress as capacity comes online

Release milestones named in the S-1

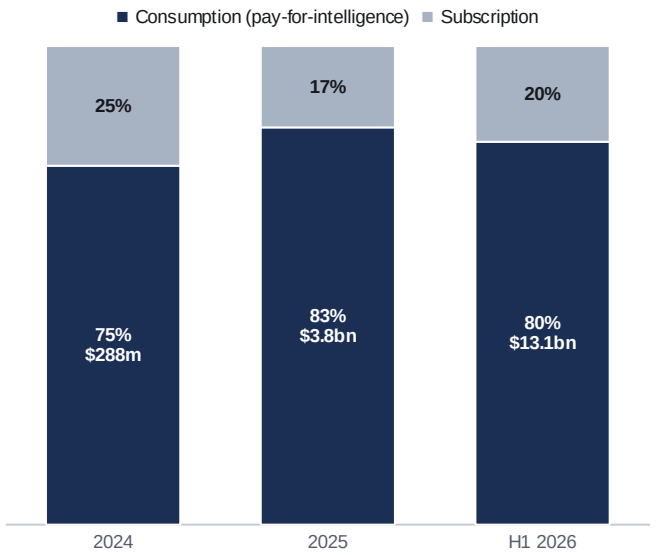

Each launch and what followed; 250 launches in the nine months to Sep 2026

Date	Release	What the S-1 reports
2024	Claude 3 family: Opus, Sonnet, Haiku	Broader commercial availability; 2024 revenue up 841%
Feb 2025	Claude Code research preview	Became the reference point for autonomous coding
Nov 2025	Opus 4.5: more capable, lower price	QoQ growth 48% to 132%; several factors combined
Jan 2026	Claude Cowork research preview	Adoption ahead of Claude Code's at the same point
Apr 2026	Mythos, gated via Project Glasswing	Held back from broad release for its cyber capabilities
Sep 2026	Opus 5.5 and Fable 5.1	Cost per task cut ~40% (Opus) and ~25% typical (Fable)

Source: S-1, MD&A, Our Financial Model and Key Factors Affecting Our Performance; Business; Risk Factors.

Revenue by revenue model

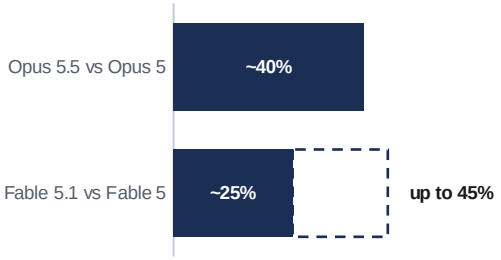

% of revenue, with $ of consumption revenue; the S-1 describes two models

Source: S-1, MD&A, How We Generate Revenue.

Customer cost per task, Sep 2026 releases

% reduction against the predecessor; solid: the typical reduction; dashed outline: Fable's "up to 45%" for complex coding and highly agentic tasks, a ceiling

Source: S-1, Business, Compute Efficiency. Lower price and better efficiency combined; the split depends on the task.

~30% to >50%

of customers at $100k+ TTM revenue used Claude Platform and at least one first-party application, Q4 2025 to Q3 2026

Source: S-1, MD&A, Adoption of Claude.

Halden & Rowe view

- The investor message is one model family sold on two revenue models, consumption (80% of H1 2026) and subscription, through direct sales and every major cloud. Cross-sell rose from about 30% to over 50% of large customers, and the three releases the S-1 cites (Opus 4.5, Opus 5.5, Fable 5.1) each lowered cost per task.

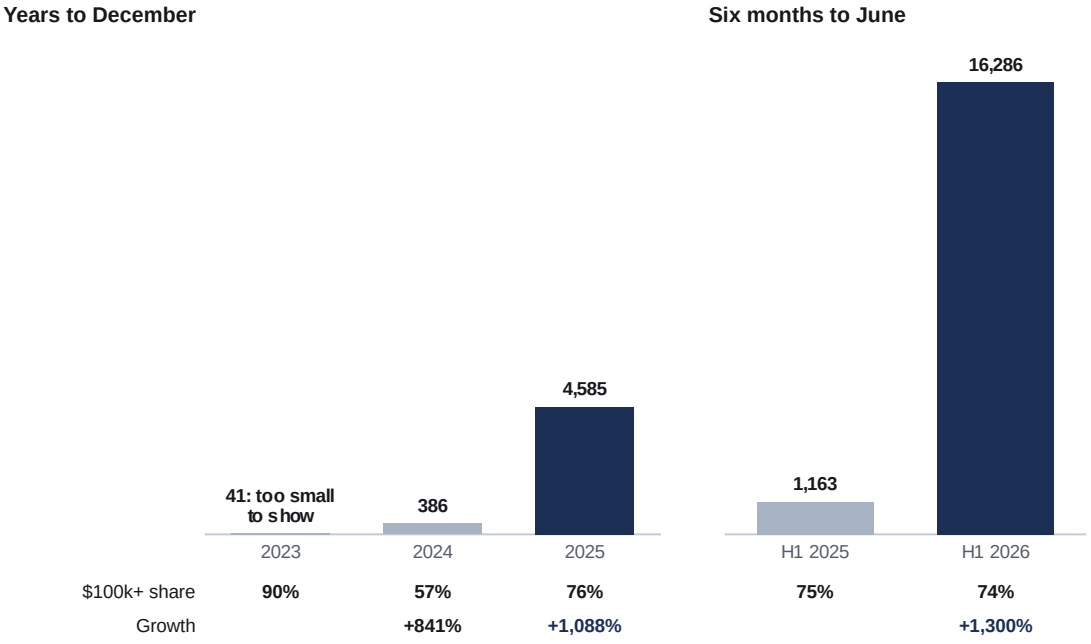

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.

3 | REVENUE GROWTH

Revenue growth

Revenue by period

$m; full years and half-years drawn apart, on one scale

Source: S-1, Summary Consolidated Financial and Other Data; MD&A, Key Factors and Comparison of Periods (share of revenue from customers at $100k+ TTM revenue).

What drives the line

- Quarter-on-quarter growth rose from 48% (Q4 2025) to 132% (Q1 2026) after Opus 4.5 (Nov 2025); the S-1 credits several factors together: lower prices and better capability, new products and wider adoption.
- Versions released in the six months to Sep 2026 earned over 80% of Q3 2026 revenue.
- Revenue from customers at $100k+ TTM revenue grew from about $37m (2023) to $220m (2024) and $3.5bn (2025); for the six months to June it was $12.0bn in 2026 against $870m in 2025.
- Seasonal: spend fell about 20% in the two weeks to 2 Jan 2026 against the prior two weeks.
- An estimated 5% to 7% of nine-month 2026 revenue came from customers in breach of usage policy or terms; the S-1 expects this to decline.
- The S-1 expects the growth rate to decline, possibly significantly.

Where the H1 2026 growth came from

Six months to June 2026 against the same months of 2025, as the S-1 states it

	H1 2025	H1 2026
Revenue ($m)	1,163	**16,286**
Consumption-based revenue increase		**+$12.1bn**
Subscription-based revenue increase		**+$3.0bn**
Customers at $100k+ TTM revenue (30 June)	>600	**>6,000**
Revenue from those customers	$870m	**$12.0bn**
Their share of revenue	~75%	**~74%**

Source: S-1, MD&A, Comparison of the Six Months Ended June 30, 2025 and 2026 (Revenue).

Quarterly results

$m unless stated; three months to the date shown

	Q1 2025	Q2 2025	Q3 2025	Q4 2025	Q1 2026	Q2 2026
Revenue	376	787	1,382	2,040	4,731	**11,555**
Growth on prior quarter (%)		*109.3*	*75.6*	*47.6*	*131.9*	**144.2**
Compute and infrastructure	944	1,390	2,047	2,945	3,387	**5,558**
Personnel	218	320	489	812	1,295	**1,857**
Sales, marketing and partnerships	24	96	202	246	1,033	**2,135**
Other operating and administrative	125	181	233	873	683	**1,031**
Bartz settlement			1,500			
Operating income (loss)	**(935)**	**(1,200)**	**(3,089)**	**(2,836)**	**(1,667)**	**974**
Operating margin (%)	*(249)*	*(152)*	*(224)*	*(139)*	*(35)*	**8**
Adj. operating income (loss)	**(830)**	**(1,019)**	**(1,284)**	**(1,721)**	**(617)**	**2,235**
Adj. operating margin (%)	*(221)*	*(129)*	*(93)*	*(84)*	*(13)*	**19**

Growth on prior quarter computed by Halden & Rowe from the S-1 quarterly table; the S-1 states 48% (Q4 2025) and 132% (Q1 2026). Q2 2026 revenue was 1,368% above Q2 2025.

Source: S-1, MD&A, Quarterly Results of Operations and Quarterly Adjusted Operating Income (Loss).

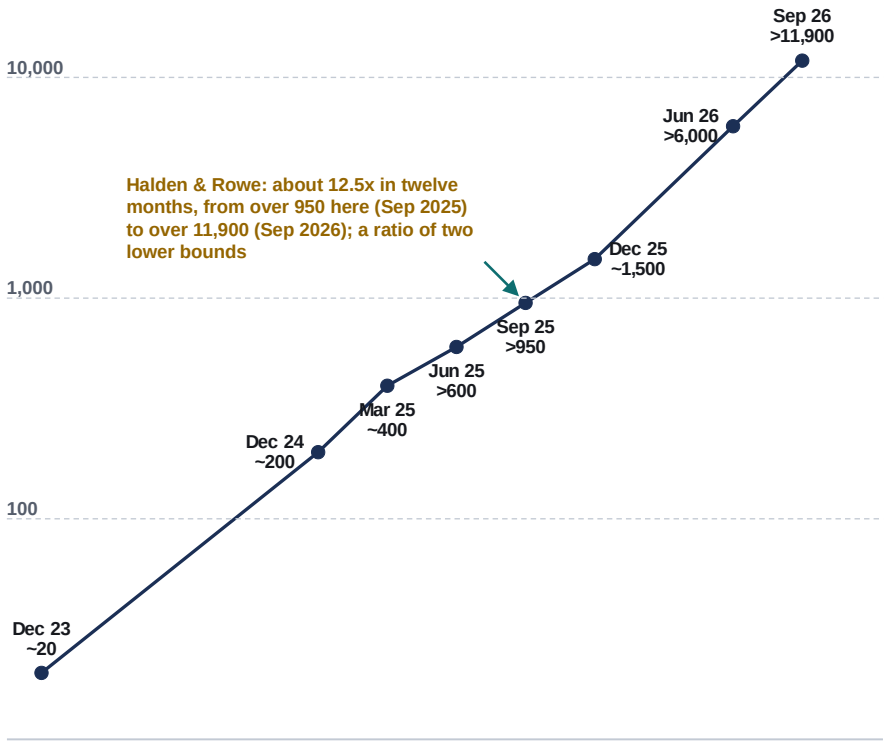

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.

4 | CUSTOMER AND USAGE METRICS

Customer and usage metrics

Customers paying $100k+ a year

Count with $100k or more of TTM revenue at each date the S-1 gives (none for Mar 2026), spaced by date; log scale, so equal rises are equal growth rates; the S-1's approximations as stated

Source: S-1, MD&A, Key Factors Affecting Our Performance; Comparison of Periods; Quarterly Trends; Business.

Customers by annual spend, Sep 2026

TTM revenue per customer

Tier	Customers
$10m or more	~250
$1m or more	>1,900
$100k or more	**>11,900**
Under $100k	~40 million

$100k+ customers' share of revenue: 90%, 57% and 76% in 2023 to 2025, 74% in H1 2026. Over 50% of the Fortune 500 and over 30% of the Global 2000 are $100k+ customers. Revenue from them grew from about $37m (2023) to $3.5bn (2025).

Penetration, expansion and efficiency

As stated in the S-1

Metric	Value	As of
Net Revenue Retention	**~900%**	**Sep 2026**
Fortune 10 that are $100k+ customers	All 10	Sep 2026
Fortune 500 / Global 2000 penetration	>50% / >30%	Sep 2026
Revenue as share of F500 customers' expenses	<0.1%	Q3 2026
Same, top 10 F500 customers	<1%, >8x avg.	Q3 2026
Enterprise users with Claude Code, top 5%	~20x spend	Q3 2026
TTM revenue per employee	>$6.6m vs $1.4m	Sep 2026 vs 2025
Employees	~5,300	Sep 2026
TTM revenue / headcount growth	~1,200% / ~170%	Year to Sep 2026

Source: S-1, Prospectus Summary; MD&A, Key Factors; Business.

Fortune 500 sector leaders that are $100k+ customers

Of the ten largest Fortune 500 companies in each group, as of 30 Sep 2026; the S-1 does not say when each became one

Fortune 500 group	$100k+ customers
Software and IT services	10 of 10
Internet	10 of 10
Banks	10 of 10
Pharmaceuticals	9 of 10
Semiconductors	9 of 10
Healthcare	8 of 10

Source: S-1, Business, Unprecedented Financial Model.

Revenue concentration

% of quarterly revenue; navy: outside the top five, as the S-1 states it, approximately; ochre: the top five, Halden & Rowe's complement; no customer was over 10% of nine-month 2026 revenue

Source: S-1, MD&A, Key Factors Affecting Our Performance. Top-five shares: Halden & Rowe, 100% less the S-1's ~64% and ~79%.

Halden & Rowe view

- Breadth is the answer to concentration: the top five customers' share fell from about 36% to about 21% of revenue between Q1 and Q3 2026 (Halden & Rowe, from the S-1's ~64% and ~79% outside them), and by September 2026 all ten of the largest Fortune 500 banks and of the largest software and IT services companies were $100k+ customers; the debate will be how much of ~900% NRR survives as the base matures.

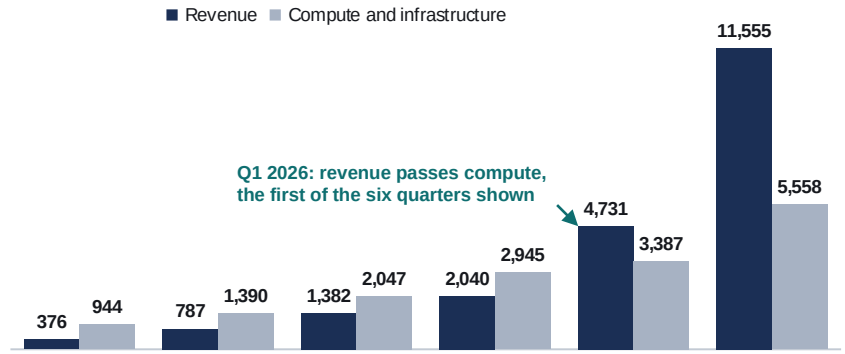

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.

5 | MARGINS AND THE COST OF COMPUTE

Margins and the cost of compute

Revenue against compute and infrastructure expense

$m by quarter; compute as % of revenue beneath

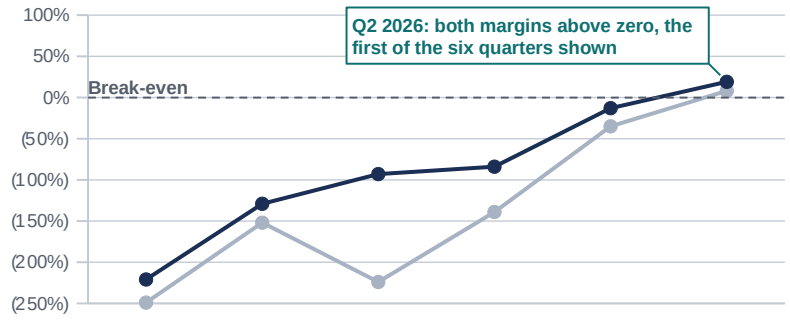

Compute / revenue	Q1 25	Q2 25	Q3 25	Q4 25	Q1 26	Q2 26
	251%	**177%**	**148%**	**144%**	**72%**	**48%**

Source: S-1, MD&A, Quarterly Results of Operations (as a percentage of revenue).

GAAP and adjusted operating margin

% of revenue by quarter; navy: adjusted, grey-blue: GAAP; dashed line: break-even; each quarter's margins beneath

	Q1 25	Q2 25	Q3 25	Q4 25	Q1 26	Q2 26
GAAP	**(249%)**	**(152%)**	**(224%)**	**(139%)**	**(35%)**	**8%**
Adjusted	**(221%)**	**(129%)**	**(93%)**	**(84%)**	**(13%)**	**19%**

Source: S-1, MD&A, Quarterly Results of Operations; Quarterly Adjusted Operating Income (Loss) and Adjusted Operating Margin.

Costs and margins as a share of revenue

% of revenue, to the nearest percent; years to December and six months to June

	2023	2024	2025	H1 2025	H1 2026
By nature (as reported)					
Compute and infrastructure	1,056%	653%	160%	201%	**55%**
Personnel	232%	118%	40%	46%	**19%**
Sales, marketing and partnerships	5%	11%	12%	10%	**19%**
Other operating and administrative	151%	90%	31%	26%	**11%**
Bartz settlement			33%		
Operating margin	(1,344%)	(772%)	(176%)	(184%)	**(4%)**
Adjusted operating margin	(1,273%)	(722%)	(106%)	(159%)	**10%**
By function (Note 8)					
Cost of revenue	63%	195%	60%	88%	**15%**
Gross margin, derived by Halden & Rowe	*37%*	*(95%)*	*40%*	*12%*	*85%*
Research and development	1,029%	589%	138%	159%	**60%**
Sales and marketing	185%	42%	20%	21%	**23%**
General and administrative	166%	46%	24%	16%	**6%**

Gross margin is Halden & Rowe's calculation: revenue less cost of revenue from the S-1's functional presentation (Note 8); the S-1 does not present a gross margin. At one decimal: 36.6%, (94.8%), 39.5%, 12.4% and 85.4%.

Source: S-1, MD&A, Results of Operations (percentage of revenue); Notes to Consolidated Financial Statements, Note 8.

Why the margin moves

- Compute is committed 12 to 18 months ahead and expensed as it comes online, so cost steps up before the revenue it will serve.
- Q2 2026: revenue up 1,368% on Q2 2025 against compute expense up 300%, taking compute from 177% to 48% of revenue.
- The S-1 expects more short-term compute near term, at a higher unit cost, and says margins may compress.

Stock-based compensation

$m from the S-1; % of revenue, Halden & Rowe's arithmetic (ochre)

	2024	2025	H1 2026
SBC ($m)	192	1,165	**2,185**
% of revenue	*50%*	*25%*	*13%*

% of revenue: SBC over revenue, 192 / 386, 1,165 / 4,585 and 2,185 / 16,286; the S-1 states neither ratio.

Equity award expense not yet recognised, 30 June 2026

$bn; RSUs vest on service and on the IPO, so none was expensed to June 2026

	$bn	Recognised
RSUs: service condition satisfied or partially satisfied	2.9	Cumulative, when the IPO completes
RSUs: service condition still to be met	23.7	Over ~2.1 years
Total RSUs	**26.6**	
Other equity awards	3.1	Over ~1.3 years

Source: S-1, MD&A, Non-GAAP Financial Measures; Critical Accounting Estimates (Stock-Based Compensation); Risk Factors.

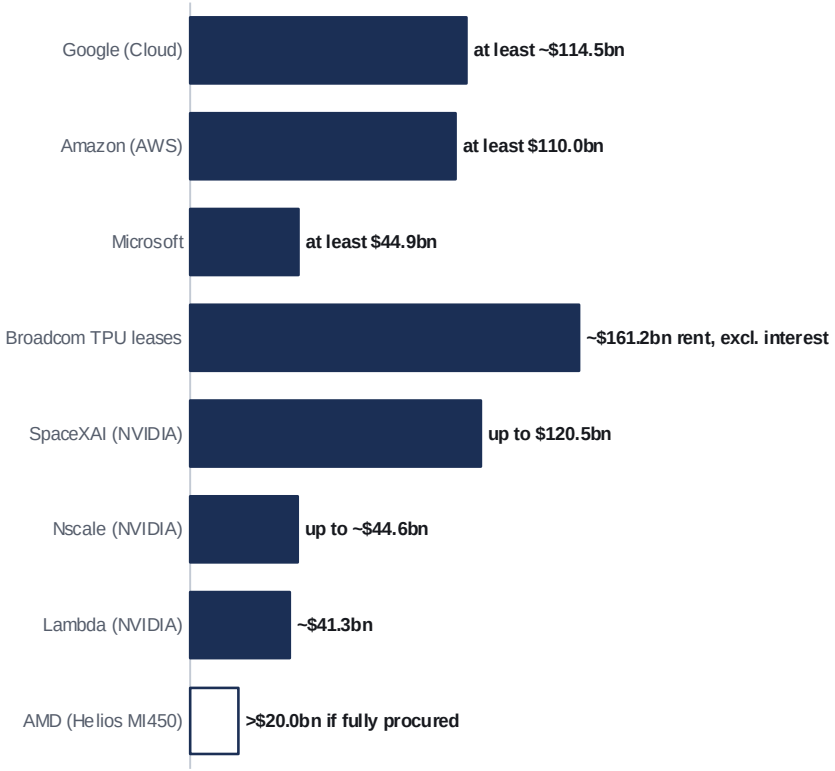

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.

6 | COMPUTE COMMITMENTS

Compute commitments

The eight compute arrangements the S-1 names

$bn as the S-1 states each, in the order of the groups below: minimums, lease rent, caps and approximations; AMD drawn in outline, having no fixed commitment

Grouped by how the S-1 states the amount	$bn; sums in ochre
Stated minimums: Google, Amazon, Microsoft	269.4
Lease rent: Broadcom	~161.2
Caps and approximations: SpaceXAI, Nscale, Lambda	~206.4
No fixed commitment: AMD, if fully procured	>20.0

Ochre: Halden & Rowe sums of S-1 amounts; Broadcom and AMD are single S-1 figures. The groups are of different kinds and are not added: no total is a floor or a cap, and the S-1 leaves its aggregate blank. Not shown: additional TPU compute from TPU providers incl. Google, 2028 to 2031, which the S-1 estimates at $125.0bn to $150.0bn.

Source: S-1, MD&A, Contractual Obligations (Infrastructure Service Arrangements; Infrastructure Equipment Leases). Group sums: Halden & Rowe.

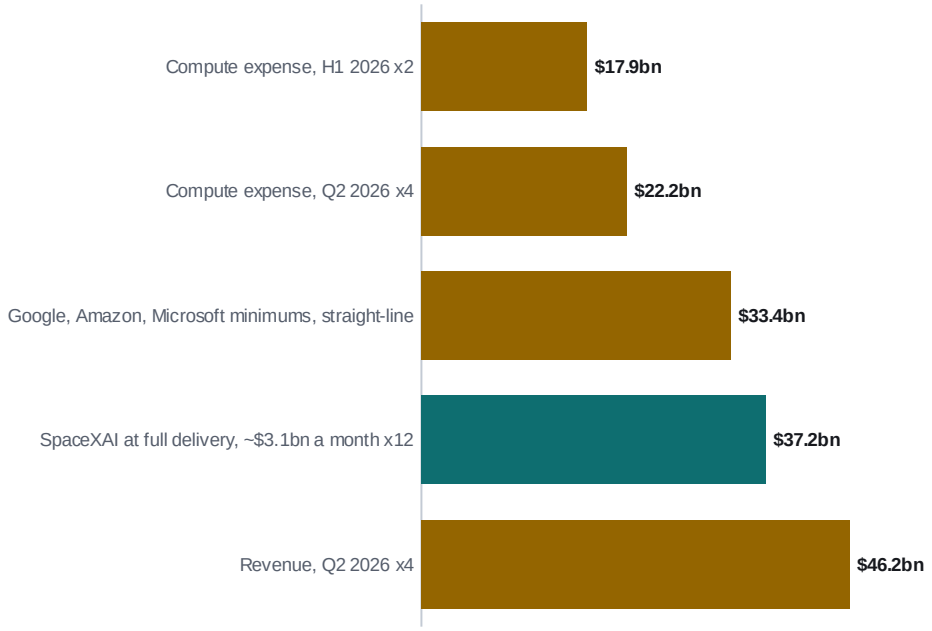

Terms of each arrangement

Counterparty, compute, term, and how the S-1 states the amount

Counterparty	Compute	Term	Amount and firmness
Google	Cloud services	Apr 2026 to Jul 2033	At least ~; non-cancelable; true-up on shortfall
Amazon	AWS cloud	May 2026 to Apr 2036	At least; non-cancelable; true-up on shortfall
Microsoft	Cloud services	Nov 2026 to May 2033	At least; non-cancelable; per-tranche exits
Broadcom	TPU racks, leased	5-year finance leases	~ rent; non-cancelable; from ready-for-service
SpaceXAI	NVIDIA GPUs	Into 2029	Up to; 90 days' notice after Jan / Mar 2027
Nscale	NVIDIA GPUs	Into 2033	Up to ~; fees as capacity is accepted
Lambda	NVIDIA GPUs	Into 2034	~; fees as accepted; $34.9bn terminable without a facility lease
AMD	Helios MI450 racks	From 2027	No fixed dollar commitment

Annual rates: commitments and compute spend, with revenue for scale

$bn a year; each bar is a Halden & Rowe annualisation of an S-1 figure (ochre; teal marks SpaceXAI, which the view names); minimums spread evenly over 88, 120 and 79 months

Source: S-1, MD&A, Quarterly Results of Operations; Contractual Obligations. Annualisation and straight-line spread: Halden & Rowe assumptions.

Halden & Rowe view

- Compute is the issue investors will price hardest. Of the eight arrangements, $269.4bn are stated minimums and ~$161.2bn non-cancelable lease rent; Nscale and Lambda accrue fees only as capacity is delivered and accepted, SpaceXAI is an up-to amount with non-cancelable initial periods to January and March 2027 and ramp-period fees, and AMD carries no fixed commitment. On a like-for-like annual basis, SpaceXAI at full delivery (~$37.2bn a year) is 2.1x H1 2026 compute expense annualised.

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.

7 | BALANCE SHEET AND CAPITAL RAISED

Balance sheet and capital raised

Balance sheet

$m; 31 December 2024 and 2025 (audited) and 30 June 2026 (unaudited)

	Dec 2024	Dec 2025	Jun 2026
Balance sheet			
Cash and cash equivalents	3,141	17,388	**112,389**
Short-term investments		2,889	**19,262**
Accounts receivable, net	95	909	**5,833**
Total assets	**7,752**	**24,661**	**147,358**
Deferred revenue	28	269	**1,650**
Convertible notes payable, at fair value	14,116	41,677	**108,566**
Total liabilities	**14,679**	**45,397**	**117,467**
Redeemable convertible preferred stock	2,874	29,769	**157,510**
Accumulated deficit	(10,040)	(52,154)	**(132,902)**
Total stockholders' deficit	(9,801)	(50,505)	**(127,619)**

Convertible notes are carried at fair value: $108.6bn on the balance sheet against $6.2bn principal of Amazon rollover notes, which convert into Class N at the lower of their fixed prices ($2.0928 and $5.0478) and the IPO price, subject to Amazon's 12% ownership cap. The deficit includes the change in fair value of convertible notes, derivative liabilities and SAFEs: $1.0bn (2023), $5.4bn (2024), $34.3bn (2025), $72.4bn (H1 2026).

Cash flows

$m; net cash provided by (used in)

	2023	2024	2025	H1 2025	H1 2026
Operating activities	(1,627)	(5,692)	(2,637)	(1,513)	**3,929**
Investing activities	(2)	(22)	(3,077)	(49)	**(17,181)**
Financing activities	2,320	7,248	19,960	4,749	**110,774**

Source: S-1, Consolidated Balance Sheets; MD&A, Cash Flows; Liquidity and Capital Resources; Convertible Notes; Risk Factors.

2026 equity financings

Price per preferred share; each converts 10:1 into common

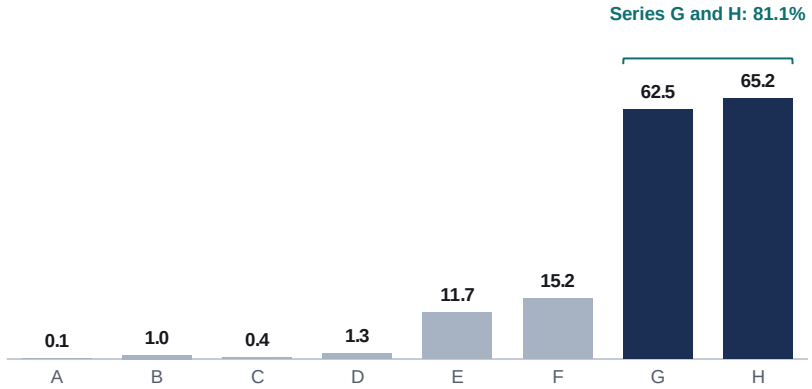

When	Round	Price	Gross $bn
Q1 2026	Series G-1 and G-2	$259.1364	30.2
Q2 2026	Series G-2 (57.9m shares) (a)	$259.1364	15.0
Q2 2026	**Series H-1 and H-2**	**$589.0095**	**65.2**

(a) The S-1 conflicts on Google's $10.0bn and Amazon's $5.0bn of May 2026 equity. Note 9 says both bought Series H. Notes 4 and 16 say they bought 38.6m and 19.3m Series G-2 shares at $259.1364, which are together the 57.9m-share, $15.0bn Q2 sale. Shown once here, priced at neither until an amendment resolves it.

Source: S-1, Notes to Consolidated Financial Statements, Series G and Series H Financings; Convertible Notes.

Preferred stock by series

$bn carrying value at 30 June 2026 by series, A to H; $157.5bn in total; capital raised to date $141.1bn

Source: S-1, Notes to Consolidated Financial Statements, Redeemable Convertible Preferred Stock; Prospectus Summary.

Facilities beyond cash, and what limits each

$bn; terms as stated in the S-1; only the revolver may fund general corporate purposes

Facility	$bn	Limits as stated
Revolving credit: general corporate purposes		
A&R revolving credit facility	**15.0**	Entered Sep 2026, after the June balance sheet; draw status not yet stated; $5.0bn liquidity covenant
Contingent capacity: restricted, gated or settled in shares		
Broadcom NPA (Infrastructure Partner)	**42.0**	Only to finance rent under the 2026 Lease Arrangement
Google 2026 NPA	**20.0**	Conditional draws to Dec 2030; cut by up to $10.0bn if Google buys at the IPO
Amazon 2026 NPA	**15.0**	$5.0bn steps on compute milestones; settled in Class N stock
AMD equity commitment	**5.0**	Class N stock on GPU delivery milestones, the first expected in 2027
Not financing capacity		
Amazon rollover notes outstanding	**6.2**	A liability: converts to Class N at the IPO up to Amazon's 12% cap; the rest stays outstanding
April 2026 tender offer	**4.7**	Stockholders bought 179.9m Class A shares at $25.9136; no proceeds to the company

Source: S-1, MD&A, Revolving Credit Agreement; AMD Agreement; Convertible Notes; Certain Relationships and Related Party Transactions, Tender Offers.

Halden & Rowe view

- Cash carries the plan: $131.7bn of cash and short-term investments at June 2026, with operating cash flow positive in H1 2026. Beyond the $15bn revolver, the NPAs and AMD commitment are restricted, gated or settled in shares, so the IPO's job is a public currency and a daily price. Series H priced at 2.27x the Series G price, while G-2 shares were still sold at the G price in the same quarter.

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.

8 | PUBLIC COMPARABLES FRAMEWORK

Public comparables framework

Operating benchmarks: latest quarter in a 10-Q or 10-K filed by 27 October 2026

$m; revenue growth on the same quarter a year earlier; GAAP operating margin as filed, unadjusted

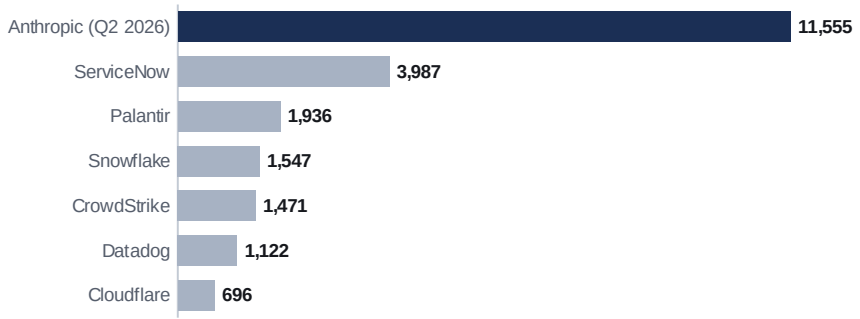

Company	Ticker	Quarter to	Revenue	Growth	Op. margin
Hyperscale platforms					
Microsoft (a)	MSFT	Jun 2026	90,007	17.7%	45.1%
Alphabet	GOOGL	Jun 2026	119,796	24.2%	34.0%
Amazon	AMZN	Jun 2026	200,606	19.6%	13.7%
Meta Platforms	META	Sep 2026	64,601	26.1%	20.1%
AI infrastructure					
NVIDIA	NVDA	Jul 2026	96,221	105.9%	66.2%
Oracle	ORCL	Aug 2026	19,345	29.6%	34.8%
Software at scale					
Palantir	PLTR	Jun 2026	1,936	92.8%	47.1%
ServiceNow	NOW	Jun 2026	3,987	24.0%	4.1%
Snowflake	SNOW	Jul 2026	1,547	35.1%	(17.0%)
Datadog	DDOG	Jun 2026	1,122	35.6%	0.5%
CrowdStrike	CRWD	Jul 2026	1,471	25.8%	(2.3%)
Cloudflare	NET	Jun 2026	696	35.9%	(29.6%)
Median of the 12 peers				***27.9%***	***16.9%***
Anthropic (S-1)		**Jun 2026**	**11,555**	**1,368.2%**	**8.4%**

(a) Fiscal fourth quarter, reported only within the FY2026 10-K: fiscal year less the nine months in the March 2026 10-Q, as is the year-earlier quarter. Quarters differ by fiscal calendar; a quarter reported by press release but not yet in a 10-Q is not used. Each value read from SEC XBRL company facts (data.sec.gov) on 27 October 2026 and found again as printed in the filed 10-Q or 10-K. Trading multiples are not shown: market prices are not in filings.

Source: company Forms 10-Q and 10-K via SEC EDGAR; Anthropic: S-1, MD&A, Quarterly Results of Operations. Medians and the Q4 derivation: Halden & Rowe.

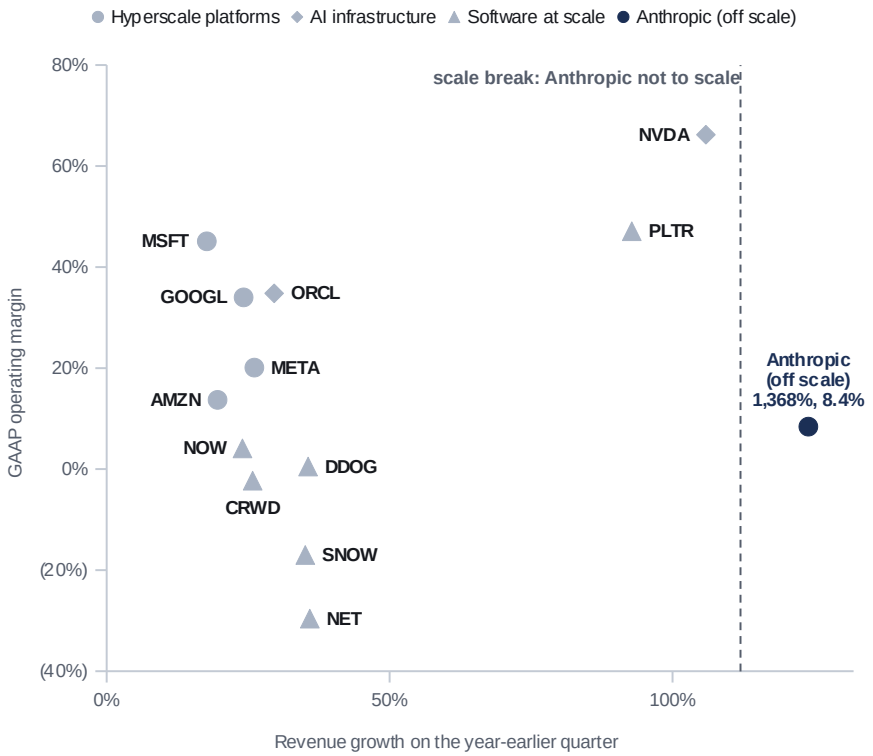

Quarterly revenue: Anthropic against the software peers

$m, latest quarter as above

Growth against GAAP operating margin

Latest quarter as in the table, %; marker shape by peer group; Anthropic placed past a scale break

Which peers answer which question

Halden & Rowe framework; OpenAI, named in the S-1 as a primary competitor, is private

Group	Why it is in the set	Link in the S-1
Hyperscale platforms	Scale and margin benchmark; where AI exposure sits today	Investors, suppliers and channels; Google a named primary competitor, and Amazon, Google and Microsoft each build competing models
AI infrastructure	Growth benchmark for the compute cycle Anthropic buys from	NVIDIA GPUs reach Anthropic via SpaceXAI, Nscale and Lambda
Software at scale	Consumption and subscription models; retention and margin	80% of revenue is consumption-based, like Snowflake and Datadog

Source: S-1, Risk Factors (competition); MD&A, Contractual Obligations; How We Generate Revenue.

Halden & Rowe view

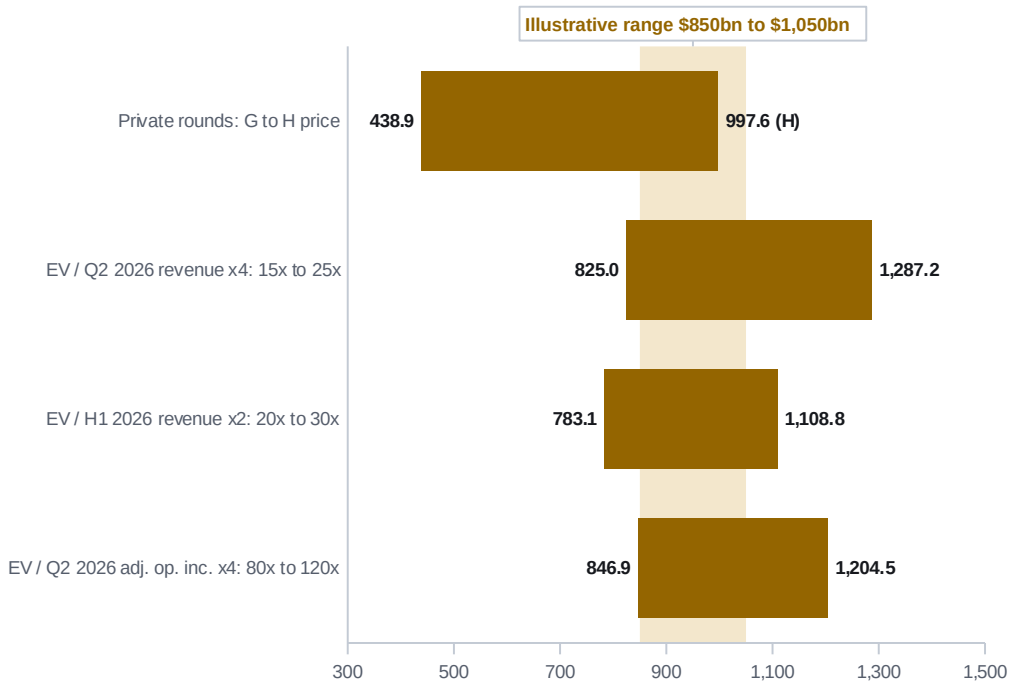

- No listed company is a true comparable: Anthropic's quarterly revenue already exceeds each software peer's, at growth 49x the peer median of 27.9%. We would anchor investors on the hyperscalers for scale and margin and on NVIDIA and Palantir for growth, and price off forward revenue rather than trailing multiples.

9 | VALUATION RANGE AND METHOD

Valuation range and method (illustrative)

Illustrative equity value by method

$bn; equity value = EV + $131.7bn of cash and short-term investments; every bar is a Halden & Rowe construction; shaded: the illustrative range, $850bn to $1,050bn; (H): the Series H price on the fully diluted count

Method	Low $bn	High $bn	Low $/sh	High $/sh	Basis
Private rounds, G to H price	438.9	997.6	25.91	58.90	S-1 prices, H&R count
EV / Q2 2026 revenue x4, 15x to 25x	825.0	1,287.2	48.71	76.00	Assumed multiple
EV / H1 2026 revenue x2, 20x to 30x	783.1	1,108.8	46.24	65.47	Assumed multiple
EV / Q2 2026 adj. op. inc. x4, 80x to 120x	846.9	1,204.5	50.00	71.11	Assumed multiple
Illustrative range	**850.0**	**1,050.0**	**50.19**	**62.00**	**H&R assumption**

Per share on 16.94bn fully diluted shares (846,840,960 Public Benefit Issuance shares are 5% of fully diluted shares at 30 June 2026, incl. the Amazon notes). The private-rounds bar prices that June 2026 count, which already includes the Series H and Public Benefit shares, at each round's price: a construction, not a post-money value. Excludes IPO proceeds, RSU tax withholding and later issuance; no IPO discount.

Source: S-1, Prospectus Summary (Public Benefit); Note 10 (Series G and H prices, 10:1 conversion); Consolidated Balance Sheets; MD&A. Multiples and range: Halden & Rowe assumptions.

Value per share: revenue base against multiple

$ per fully diluted share; EV / revenue multiple across; shaded: inside the illustrative range

Revenue base	15.0x	17.5x	20.0x	22.5x	25.0x
Q2 2026 revenue x4 ($46.2bn)	48.71	**55.53**	62.35	69.17	76.00
Same, less 6% usage-policy revenue ($43.4bn)	46.25	**52.66**	**59.08**	65.49	71.90
H1 2026 revenue x2 ($32.6bn)	36.62	41.43	46.24	**51.04**	**55.85**

The middle row removes 6%, the midpoint of the S-1's 5% to 7% estimate of nine-month 2026 revenue from customers breaching usage policy or terms, from the unrounded base: $46.22bn x 0.94 = $43.45bn. Applying a nine-month estimate to annualised Q2 2026 revenue changes its period: a Halden & Rowe assumption.

Inputs and their source

Ochre: Halden & Rowe derivation or assumption

Input	Value	Source
Cash and short-term inv., Jun 2026	$131.651bn	S-1, balance sheet
Debt deducted	None	Assumption
Fully diluted shares	16.94bn	H&R, from the S-1's 5%
Series H / Series G per common share	$58.90 / $25.91	H&R, S-1 price / 10
Q2 2026 revenue x4 / H1 2026 x2	$46.2bn / $32.6bn	H&R annualisation
Q2 2026 adj. op. income x4	$8.9bn	H&R annualisation
EV / revenue multiples	**15x to 30x**	**Assumption**
EV / adj. op. income multiples	**80x to 120x**	**Assumption**
Illustrative equity value	**$850bn to $1,050bn**	**Assumption**

No debt is deducted: the $6.2bn principal of Amazon notes ($108.6bn convertible notes at fair value) is counted as converting in the fully diluted shares. Notes Amazon's 12% cap keeps from converting would stay outstanding as debt; $443m of finance lease liabilities is also not deducted.

What the illustrative range implies

Enterprise value $718.3bn to $918.3bn against each base

Base	Low	High
EV / TTM revenue to Jun 2026 ($19.7bn)	**36.4x**	**46.6x**
EV / H1 2026 revenue x2 ($32.6bn)	**22.1x**	**28.2x**
EV / Q2 2026 revenue x4 ($46.2bn)	**15.5x**	**19.9x**
EV / Q2 2026 adj. op. income x4 ($8.9bn)	**80.4x**	**102.7x**
Equity value against the Series H mark	**(14.8%)**	**+5.3%**

Halden & Rowe view

- The three revenue and income methods overlap between $846.9bn and $1,108.8bn; the illustrative range of $850bn to $1,050bn ($50.19 to $62.00 a share) holds the Series H price on today's fully diluted count ($997.6bn), so pricing between that and $1,050bn would be an up-round for Series H investors without relying on the highest multiples.

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.

10 | OFFERING STRUCTURE AND GOVERNANCE

Offering structure and governance

Share classes after the offering

Rights of each class as described in the S-1; Class A is the class offered

	Class A	Class N	Class T	Class F	Class E
Votes	**1 per share**	None, unless law requires	Elects Class T directors, a board majority	50.1% of all votes	Limited matters
Economics	**Pro rata**	Pro rata	Par value only	Par value only	Par value only
Held by	**IPO investors and holders**	Strategic partners; Benefit Fund	LTBT, 1 share	Founder LLC, 1 share	None at IPO; for employees
Transfer	**Free; not convertible**	To Class A on sale to an unaffiliated party	Needs Trust Amendment approval	Not transferable	Not transferable

Source: S-1, Prospectus Summary, Our Capital Structure; Description of Capital Stock.

Offering and governance terms that shape demand

As stated in the S-1

Term	Detail
Controlled company	LTBT can elect a board majority; Nasdaq exemption used only for the nominating committee
Public benefit	846,840,960 Class N (5% of FD) to the Public Benefit Fund; the board may issue up to 2% more per 50% price rise held 90 of 120 days
Concurrent placement	Google may buy up to $10.0bn of Class N at the IPO price
Amazon notes	$6.2bn convert to Class N at IPO, subject to a 12% ownership cap
Founders	Each co-founder has pledged 80% of personal equity to philanthropy
Company lock-up	No Class A or N issuance to Q1 2027 results or day 180 without consent, with exceptions: NPAs, donation matching, Google placement, equity plans, acquisitions
Listing	Nasdaq, "ANT"; also offered publicly in Australia, Canada, certain EEA states, Japan, Switzerland, UK

Source: S-1, Prospectus Summary; Our Governance Structure and Its Goals; MD&A, Convertible Notes; Underwriting.

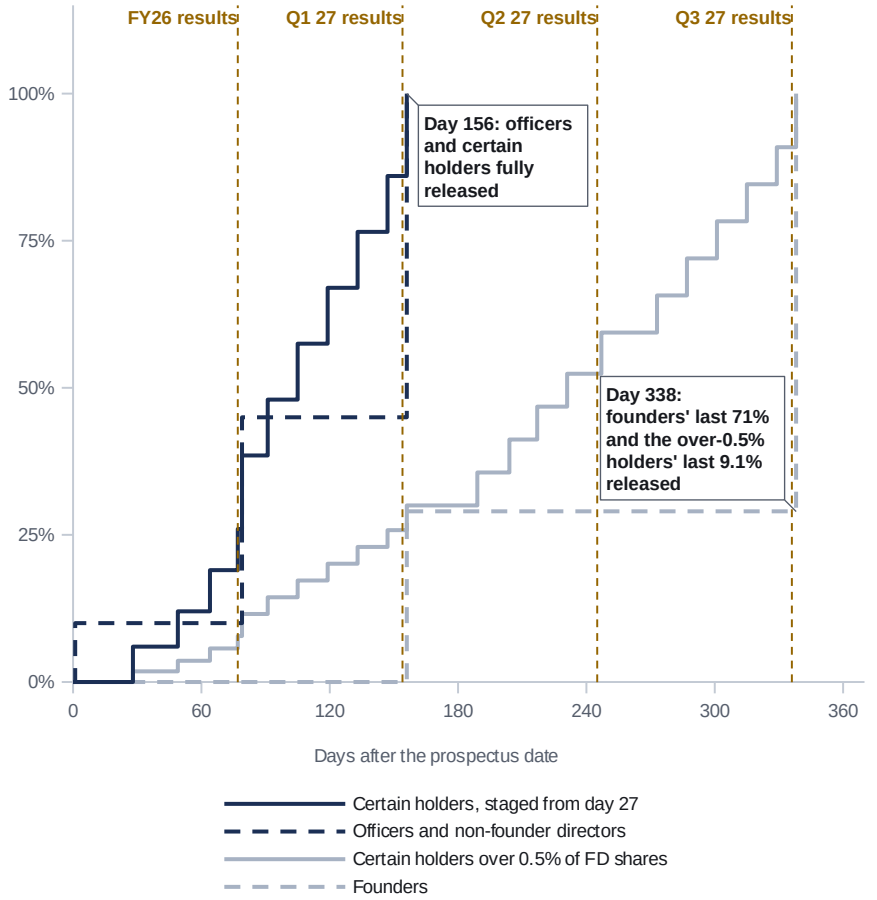

Who can sell when: the four lock-up groups

% of each group's lock-up securities, as the S-1 states the releases

Group	Early releases	Lock-up ends
Officers, non-founder directors	10% from the first trading day; 35% more after FY2026 results	Q1 2027 results or day 180
Certain holders	6%, 6%, 7%, 7% on days 27 to 76; 12.5% after FY2026 results, then 9.5% five times	Q1 2027 results or day 180
Certain holders over 0.5%	1.8% to 7.0% steps from day 27 to Q2 2027 results, then 6.3% x5 to 83 days after: 90.9%	Q3 2027 results or day 365
Founders	29% at Q1 2027 results or day 180	Q3 2027 results or day 365

Lock-up: share of each group's locked securities eligible for sale

Cumulative %, days after the prospectus date; release sizes from the S-1; results dates (ochre lines) are Halden & Rowe assumptions

Assumed results dates (ochre): FY2026 on day 77, Q1 2027 day 154, Q2 2027 day 245, Q3 2027 day 336; releases follow on the second full trading day after, taken as two days. Outer limits: day 180 (Q1 2027 gate) and day 365 (Q3 2027 gate). Releases due on a non-trading day are plotted on the next trading day, as the S-1 provides: days 27, 48, 62 and 76 fall on days 28, 49, 64, 77. Each line ends when its group is fully released. The representatives may release shares early.

Source: S-1, Underwriting, Lock-Up and Market Standoff Agreements; percentages per group as stated, cumulated by Halden & Rowe.

Halden & Rowe view

- Governance is the second debate after compute: Class A carries economics but not control. We would lead with the structure and size the deal against each group's unlocks: officers may sell 10% from the first trading day and certain holders reach 26% by day 77; holders over 0.5% reach 30.0% at the Q1 2027 gate and 90.9% by day 329; only founders stay largely locked (71%) to Q3 2027 results or day 365.

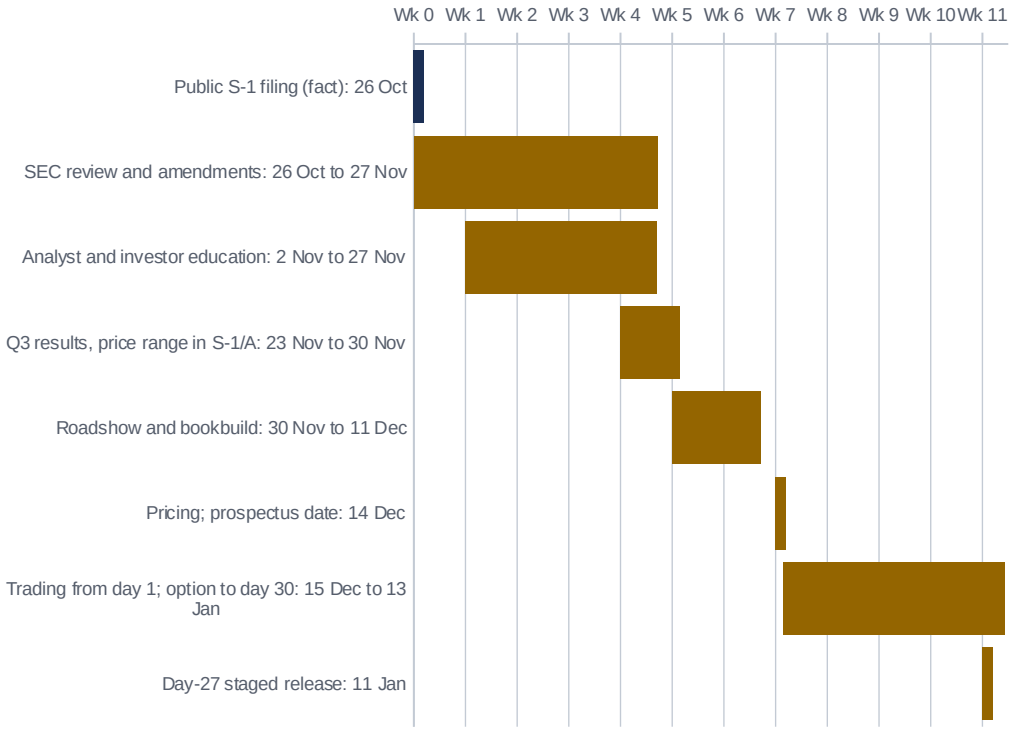

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.

11 | PROCESS TIMETABLE AND WHY HALDEN & ROWE

Process timetable and why Halden & Rowe

Illustrative timetable from the public filing to first trading

Weeks from 26 October 2026; navy: S-1 fact; ochre: Halden & Rowe assumption

Every span except the filing is an illustrative assumption, with pricing and the prospectus dated Monday 14 Dec 2026. Day counts are the S-1's, counted from that date: trading opens on the first trading day after it (15 Dec); the 30-day over-allotment option runs to 13 Jan; day 27 (10 Jan 2027) is a Sunday, so the S-1 moves that release to the next trading day, 11 Jan.

Why Halden & Rowe

What we would commit to; credentials omitted: the bank is fictional and has no record to cite

- One story for four tests: growth durability, compute, governance and revenue quality, each answered from the S-1's own figures.
- Investor education built on the compute ledger: minimums, lease rent, caps and uncommitted capacity kept apart, and set against cash.
- Book-building weighted to long-horizon holders who can own a PBC with an LTBT-elected board.
- Aftermarket plan sized to each holder group's unlocks: 10% for officers from day 1, staged releases from day 27, founders to day 365.
- Coordination with Google's concurrent placement and the Amazon note conversion.

Dates the S-1 fixes after pricing

Days after the prospectus date, in date order; ochre: placed on the assumed calendar, rolled to trading days

Event	S-1 timing	On our calendar
Officers, directors: up to 10% sellable	**Day 1, first trading**	15 Dec
Dealer prospectus delivery ends	**Day 25**	8 Jan
Staged releases, certain holders	**Days 27, 48, 62, 76**	11 Jan, 1 Feb, 16 Feb, 1 Mar
Over-allotment option expires	**Day 30**	13 Jan
Further releases, incl. officers' 35%	**After FY26 results**	From day 79
Main lock-up ends; founders may sell 29%	**Q1 27 results or day 180**	Day 156
Founders, holders over 0.5%: lock-up ends	**Q3 27 results or day 365**	Day 338

Source: S-1, Underwriting; prospectus cover and back page.

The five questions the book must answer

S-1 evidence and how Halden & Rowe would position each

Investor question	S-1 evidence	Halden & Rowe positioning
Is the growth durable?	QoQ revenue growth 131.9% and 144.2% in 2026; versions released in the prior six months earned >80% of Q3 revenue; the S-1 expects growth to slow	Lead with cohort breadth and NRR, not the peak quarter
Can it carry its compute?	Eight named arrangements: $269.4bn of stated minimums and ~$161.2bn of lease rent, plus caps and estimates; the aggregate is blank	Separate firm from conditional amounts and show the 12 to 18 month lag
Who controls the company?	Class F 50.1% of votes; LTBT elects a board majority; controlled company	Present governance as designed, with the PBC duties and investor protections
How clean is the revenue?	An estimated 5% to 7% of nine-month 2026 revenue from customers in breach of terms; top five ~21% of Q3 revenue (H&R, from the S-1's ~79% outside them)	Disclose the haircut case; show concentration falling
Partners or competitors?	Amazon and Google invest, supply, distribute and compete; Google has an option to buy up to $10.0bn at the IPO	Frame the partners as anchor demand and diversified supply

Source: S-1, MD&A (Quarterly Results, Contractual Obligations, Key Factors); Prospectus Summary; Our Governance Structure. Group sums: Halden & Rowe.

Unofficial demonstration built from Anthropic, PBC's public Form S-1 (filed 26 October 2026). Not prepared by or affiliated with Anthropic. Not investment advice.
