Falcon (private)		**NA**	**NA**	**NA**	**NA**	**NA**	**NA**	**NA**	**5.8**	**18.9**

Revenue multiple against margin

x and %; eight listed peers; dashed line: least-squares fit, r = 0.99

Falcon against the peer set

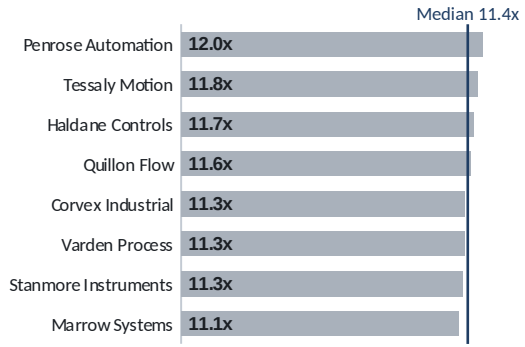

Falcon against peer 25th percentile, median and 75th percentile; rank 1 is the highest of nine, Falcon included

Metric	Falcon	25th pct	Median	75th pct	Rank
EBITDA margin LTM (%)	**18.9**	15.7	18.6	20.1	4 of 9
Revenue growth NTM (%)	**5.8**	4.8	5.7	5.9	3 of 9 (tied)
Revenue LTM ($m)	**1,460**	1,552	2,990	3,875	7 of 9
EBITDA LTM ($m)	**276**	244	557	784	6 of 9

Falcon LTM revenue $1,460m, NTM $1,545m; LTM EBITDA $276m, NTM $301m.

EV / NTM EBITDA by peer

x; axis from zero; all eight within 0.9x of each other

Trading view

- Peers trade at 11.1x to 12.0x NTM EBITDA (median 11.4x) and 12.0x to 13.2x LTM (median 12.4x): a 0.9x and 1.2x spread across eight companies.
- EV / NTM revenue runs from 1.59x (Tessaly, 13.1% margin) to 2.76x (Penrose, 22.4%) and tracks margin with a correlation of 0.99: revenue multiples restate the EBITDA multiple, not a separate view.
- Falcon's 18.9% LTM margin ranks 4 of 9 and its 5.8% NTM growth 3 of 9 (level with Varden), both within 0.3pp of the peer median, which supports applying the median multiple without a profile adjustment.
- On the fitted line Falcon's margin implies 2.24x NTM revenue, $3,461m of EV, against $3,440m at the median NTM EBITDA multiple.
- Falcon is smaller than six of eight peers: LTM revenue of $1,460m against a peer median of $2,990m. Larger peers trade somewhat higher (correlation 0.44 between EV and NTM EBITDA multiple), too few points to size a discount: no discount is applied, and this needs a view from the deal team.

	High			*3,210*	*2.62x*	*13.8x*	*249*	*19.5*
	Low			*890*	*1.71x*	*9.8x*	*91*	*17.4*
	Median, sponsors (3)			**2,050**	**2.44x**	**12.9x**	**168**	**19.0**
	Median, strategics (5)			**1,320**	**2.05x**	**11.1x**	**116**	**18.3**

Sponsor buyers: KKR-backed Arcis, Blackstone and Carlyle; the five strategic acquirers are all in the peer set on sheet 1. Implied LTM EBITDA = EV / (EV / LTM EBITDA); implied margin = (EV / LTM revenue) / (EV / LTM EBITDA).

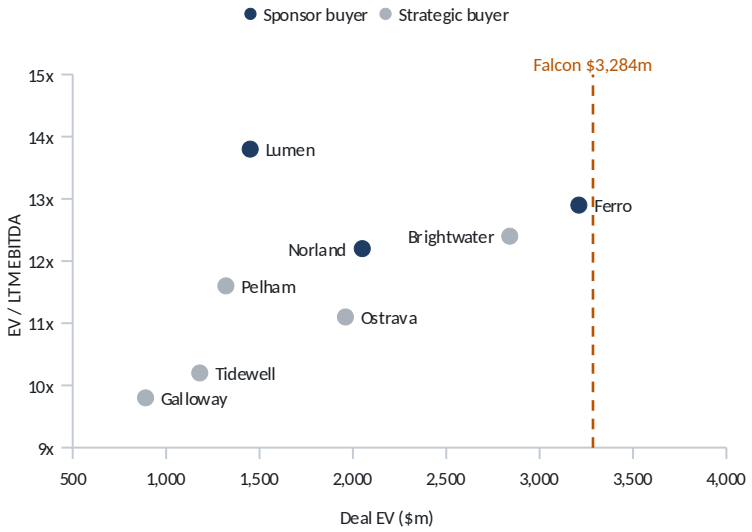

EV / LTM EBITDA by deal, ranked

x; sponsor buyers in navy, strategic buyers in grey

Deal size against multiple

$m and x; eight deals, r = 0.57; dashed line: Falcon's EV at the precedent median

Precedent view

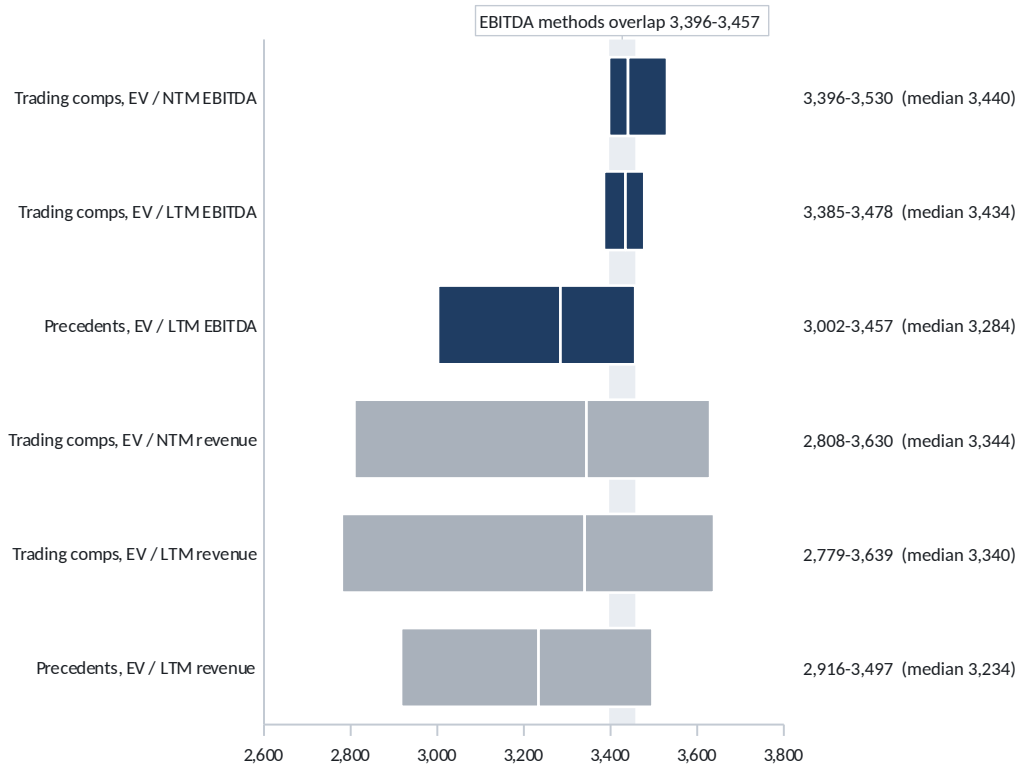

- Sponsors paid a median 12.9x LTM EBITDA across 3 deals, strategic buyers 11.1x across 5; three of the four highest multiples are sponsor deals.
- The precedent median of 11.9x sits 4.4% below the listed peers' 12.4x LTM today, so the set shows no control premium over current trading. Peer multiples at each announcement date are not in the data; checking them would show whether markets have re-rated since.
- No drift over time: deals announced in 2025-2026 have a median of 11.8x, those in 2023-2024 11.9x.
- Implied target margins run 17.4% to 19.5% (median 18.5%), around Falcon's 18.9%.
- Larger deals priced higher: the 3 deals of $2,000m or more have a median of 12.4x against 11.1x for the 5 smaller (correlation 0.57; eight deals is too few to rely on).
- At the precedent median Falcon's EV is $3,284m, above the largest deal in the set (Ferro Controls, $3,210m): if size carries a premium, the precedent median understates Falcon.

Valuation summary: football field and implied values

Implied enterprise value by method

$m; bar spans the 25th to 75th percentile multiple applied to Falcon; break in the bar at the median; EBITDA methods in navy

Valuation view

- The three EBITDA methods give $3,002m to $3,530m between their 25th and 75th percentiles, and all three overlap at $3,396m to $3,457m (shaded): 12.3x to 12.5x LTM EBITDA, 11.3x to 11.5x NTM.
- Revenue methods span $2,779m to $3,639m, wider because peer revenue multiples vary with margin (sheet 1); they are shown for completeness and add little independent information.
- Precedents sit lowest on both metrics: $3,284m at the median EBITDA multiple against $3,440m on NTM trading comps, because the deal set priced below where peers trade today (sheet 2).
- No DCF or LBO range is shown: the data supplied covers market multiples only.
- Implied equity value needs Falcon's net debt at the valuation date, which is not in the data supplied.

The EBITDA overlap restated as multiples

x; enterprise value at each end of the overlap divided by Falcon's metric

Falcon metric ($m)	At $3,396m	At $3,457m
EBITDA LTM, 276	12.3x	12.5x
EBITDA NTM, 301	11.3x	11.5x
Revenue LTM, 1,460	2.33x	2.37x
Revenue NTM, 1,545	2.20x	2.24x

Implied values

$m unless stated; multiples are the 25th percentile, median and 75th percentile of each set; last column restates each median EV on Falcon LTM EBITDA of $276m
